

# Atlas Overview

*SecurityScorecard's Atlas* accelerates the due diligence exchange process by enabling organizations to manage, complete and review cybersecurity due diligence requests and evidence with ease in a central repository.

## **Benefits of using Atlas:**

-  Leveraging SecurityScorecard ratings to rapidly auto-validate due diligence responses
-  Easier filling in of due diligence requests
-  SSC ratings and proprietary risk insights
-  Mapping to custom due diligence requests
-  Enhanced reporting functions
-  Due diligence request management at scale
-  Dramatically reduced turnaround time on due diligence requests
-  Due diligence auto-completion with our machine learning engine
-  Easy to manage central repository of questions and responses
-  Rapid sending of due diligence requests

**SecurityScorecard** helps enterprises gain operational command of their security posture and the security posture of their third-parties through continuous, non-intrusive monitoring. The company's approach to security focuses on identifying vulnerabilities from an outside-in perspective, the same way a hacker would.
