

Dr. John A. Beel
SCHOLARSHIP

for

Chemistry Students

in the

School of Chemistry, Earth Sciences, & Physics

College of Natural and Health Sciences

University of Northern Colorado

Helen Poeppel Dalzell, class of 1951, and Darwin Dalzell, class of 1952, met at Colorado State College of Education as students pursuing teaching careers. While majoring in the field of physical sciences, chemistry courses became their favorites due to Dr. John Beel. His skill at making his courses challenging, understandable, and applicable made Helen and Dalzell look forward to his lectures and labs.

Helen entered her 30-year teaching career at Eaton elementary school. Darwin taught one year before entering the industrial field working as a chemist in various projects related to coatings. The Dalzells acknowledge that the education they received at UNC (Colorado State College of Education) by the faculty, and especially from Professor Beel, transferred into meaningful careers.

The Dr. John A. Beel Scholarship is awarded to Chemistry students in the School of Chemistry, Earth Sciences and Physics.

The University of Northern Colorado Foundation is pleased to recognize the generosity of Darwin and Helen Dalzell, who provided the gifts to create this fund to perpetuate excellence in the School of Chemistry, Earth Sciences, and Physics.
