EXAMPLE

Activation Code 231

Lock button 2X:

Panic button 3X:

Unlock button 1X:

PAIRING INSTRUCTIONS

1. Press **PANIC** and **LOCK** at the same time to enter device setup. The red **LED** will illuminate solid.
2. Once in setup mode, enter your code from the vehicle lookup list with the following sequence: **LOCK**, **PANIC**, and **UNLOCK** for the specified number of times. Please see illustrated example. If your vehicle's code is 231 you would press **LOCK** twice, **PANIC** 3 times, and **UNLOCK** once.
3. Press **PANIC** and **LOCK** at the same time again to exit device setup. If the **LED** blinks 1 time, the code was entered correctly. If the **LED** blinks 3 times, an invalid code was entered, and you need to start over starting at step 1.
4. Proceed with the usual pairing process for the selected vehicle.

NOTE: If activation code 1 does not pair to the vehicle, use activation code 2.

FCC REGULATORY STATEMENT

Model: 300-0388

FCC ID: X32-AFK41B1

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications to this device not expressly approved by iKeyless LLC could void the user's authority to operate the equipment.

IC REGULATORY STATEMENT

Model: 300-0388

IC: 8797A-AFK41B1

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of the type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for the successful communication. This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour l'émetteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'intention des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité nécessaire à l'établissement d'une communication satisfaisante. Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
