

COURSE HIGHLIGHTS

ONE FULL DAY once a month (3rd or 4th Sunday) starting from August 2023 for 12 Months

LIVE STREAMING of system-wise theory course to specific offices allowing interactive discussions

SPECIALIST FACULTY with immense experience and knowledge of the subject. Apart from practical tips, the sessions will update you on incorporating up-to-date evidence-based information in fetal medicine & genetics.

WHATSAPP GROUP for day-to-day interaction & continuous mentoring during the course.

SUBMISSION of FETAL SCAN IMAGES online for review and feedback

WEBINARS keynote addresses from world authorities in fetal imaging and fetal medicine

2-year complimentary **ISUOG MEMBERSHIP** given to all enrolled Delegates

The Course has been designed to improve your scanning skills to achieve international standards and to provide a better understanding of the evolution of fetal abnormalities and their management thereof

Lead Mentors

Dr Prathima Radhakrishnan

Dr Anita Kaul

Dr Deepak Bansal

More Than 500 students have benefitted from our FUP- Onsite and Online Classes. On completion of the course, delegates have obtained FMF certification in NT and Fetal Abnormalities, Boosting their confidence and expertise

TESTIMONIAL

Dr Rakhee Gupta, Ludhiana
Many many thanks to all the mentors for such an elaborate and well structured training program. We have really benefited a lot from this training, despite doing fetal medicine practice since last so many years.

Dr Preeti Tak, Jaipur
Gratitude to mentors for their elaborate teaching over the span of one year. The well structured program designed for a year has helped us imbibe knowledge at the right pace. Didn't know that online ear pulling could be possible with repeated image submissions till i got the plane right. Getting a hang of magnification itself took a couple of months !!

Dr Shilpa Karki, Bangalore .
I want to thank the entire Faculty . Radiologists in our places are appreciating us..A Lot of other gynae ppl also waiting to join next academic year.

Program is Supported By
