PLAN

PREPARED FOR:

US Central Financial is an independent financial services firm helping individuals create retirement strategies using a variety of investment and insurance products to custom suit their needs and objectives. Investing involves risk, including the potential loss of principal. No investment strategy can guarantee a profit or protect against loss in periods of declining values. Any comments regarding safety and guaranteed income streams refer only to fixed insurance products. They do not refer, in any way to securities or investment advisory products. Insurance and Annuity product guarantees are subject to the claims-paying ability of the issuing company. Advisory services offered through J.W.Cole Advisors, Inc. (JWCA). JWCA and U.S. Central Financial are unaffiliated entities.

Based on **the rule of 100**, we suggest that a prudent person would not have an exceptionally high amount of money "at risk" based on their age. To determine the maximum amount of money you should have "at risk" in the markets should follow this formula: **100 – Your Age = Maximum %**. So, if you're 58, then your maximum allocation is 42% ($100 - 58 = 42\%$).

The rule of 100 is a general rule of thumb to provide an estimate only; individual circumstances and objectives will vary.
