

## 2013 Top Advisor Rankings by State

Here are America's best financial advisors, organized by state. The rankings are based on data provided by over 4,000 of the nation's most productive advisors. Factors included in the rankings: assets under management, revenue produced for the firm, regulatory record, quality of practice and philanthropic work. Investment performance isn't an explicit component because not all advisors have audited results and because performance figures often are influenced more by clients' risk tolerance than by an advisor's investment-picking abilities. A ranking of "N" denotes "not ranked that year".
