Spring arrived very early here in Northern Virginia, and with it thoughts of tax returns, 2023 tax planning, and spring cleaning. This issue of our newsletter includes 2023 tax tables and retirement plan contribution limits as well as guidelines for keeping your financial records organized and current.

In late December, the latest changes to retirement plan rules was passed: SECURE 2.0. The primary change effective January 1, 2023, include increasing the age at which required minimum distributions (RMDs) start to 73 for those born 1951-1958, and age 75 if you were born in 1959 or later. There are a number of other changes effective in later years we'll cover elsewhere.

If your financial situation has changed, you've experienced a significant life event or you are considering making a change, let us know so we can update your planning.

Honey, They Shrunk the Groceries

Have you noticed that packages are smaller at the grocery store? If so, you're not alone. A majority of U.S. adults have noticed shrinkflation — products shrinking in size while prices stay the same or increase. And about two out of three are very or somewhat concerned about the trend.

Consumers were most likely to say they noticed shrinkflation with snack items, followed by pantry items and frozen food. Shoppers also noticed it with meat, bread, beverages, dairy, produce, and other items. Here's what consumers did when they noticed shrinkflation.

Key Retirement and Tax Numbers for 2023

Every year, the Internal Revenue Service announces cost-of-living adjustments that affect contribution limits for retirement plans and various tax deduction, exclusion, exemption, and threshold amounts. Here are a few of the key adjustments for 2023.

Estate, Gift, and Generation-Skipping Transfer Tax

- The annual gift tax exclusion (and annual generation-skipping transfer tax exclusion) for 2023 is $17,000, up from $16,000 in 2022.
- The gift and estate tax basic exclusion amount (and generation-skipping transfer tax exemption) for 2023 is $12,920,000, up from $12,060,000 in 2022.

Standard Deduction

A taxpayer can generally choose to itemize certain deductions or claim a standard deduction on the federal income tax return. In 2023, the standard deduction is:

- $13,850 (up from $12,950 in 2022) for single filers or married individuals filing separate returns
- $27,700 (up from $25,900 in 2022) for married joint filers
- $20,800 (up from $19,400 in 2022) for heads of household

The additional standard deduction amount for the blind and those age 65 or older in 2023 is:

- $1,850 (up from $1,750 in 2022) for single filers and heads of household
- $1,500 (up from $1,400 in 2022) for all other filing statuses

Special rules apply for those who can be claimed as a dependent by another taxpayer.

IRAs

The combined annual limit on contributions to traditional and Roth IRAs is $6,500 in 2023 (up from $6,000 in 2022), with individuals age 50 or older able to contribute an additional $1,000. The limit on contributions to a Roth IRA phases out for certain modified adjusted gross income (MAGI) ranges *(see chart).* For individuals who are active participants in an employer-sponsored retirement plan, the deduction for contributions to a traditional IRA also phases out for certain MAGI ranges *(see chart).* The limit on nondeductible contributions to a traditional IRA is not subject to phaseout based on MAGI.

MAGI Ranges: Contributions to a Roth IRA

	2022	2023
Single/Head of household	$129,000–$144,000	$138,000–$153,000
Married filing jointly	$204,000–$214,000	$218,000–$228,000
Married filing separately	$0–$10,000	$0–$10,000

MAGI Ranges: Deductible Contributions to a Traditional IRA

	2022	2023
Single/Head of household	$68,000–$78,000	$73,000–$83,000
Married filing jointly	$109,000–$129,000	$116,000–$136,000

Note: The 2023 phaseout range is $218,000-$228,000 (up from $204,000-$214,000 in 2022) when the individual making the IRA contribution is not covered by a workplace retirement plan but is filing jointly with a spouse who is covered. The phaseout range is $0-$10,000 when the individual is married filing separately and either spouse is covered by a workplace plan.

Employer-Sponsored Retirement Plans

- Employees who participate in 401(k), 403(b), and most 457 plans can defer up to $22,500 in compensation in 2023 (up from $20,500 in 2022); employees age 50 or older can defer up to an additional $7,500 in 2023 (up from $6,500 in 2022).
- Employees participating in a SIMPLE retirement plan can defer up to $15,500 in 2023 (up from $14,000 in 2022), and employees age 50 or older can defer up to an additional $3,500 in 2023 (up from $3,000 in 2022).

Kiddie Tax: Child's Unearned Income

Under the kiddie tax, a child's unearned income above $2,500 in 2023 (up from $2,300 in 2022) is taxed using the parents' tax rates.

Time for a Spring Cleanup: Organizing Your Financial Records

The arrival of spring is always a good time to dust off the cobwebs that have built up in your home during the winter. It's also a good time to clean out and organize your financial records so you can quickly locate something if you need it.

Keep Only What You Need

If you keep paperwork because you "might need it someday," your home office and file cabinets are likely overflowing and cluttered with nonessential documents. One key to organizing your financial records is to keep only what you absolutely need for as long as you need it.

Tax records. Keep all personal tax records for three years after filing your return or two years after the taxes were paid, whichever is later. (Different rules apply to business taxes.) If you underreported gross income by more than 25% (not a wise decision), keep the records for six years, and for seven years if you claimed a deduction for worthless securities or bad debt. It might be helpful to keep your actual tax returns, W-2 forms, and other income statements until you begin receiving Social Security benefits.

Financial statements. You generally have 60 days to dispute charges with banks and credit cards, so you could discard statements after two months. If you receive an annual statement, throw out monthly statements once you receive the annual statement. If your statements include tax information (e.g., you use credit-card statements to track deductions), follow the guidelines for tax records.

Retirement account statements. Keep quarterly statements until you receive your annual statement; keep annual statements until you close the account. Keep records of nondeductible IRA contributions indefinitely to prove you paid taxes on the funds.

Real estate and investment records. Keep at least until you sell the asset. If the sale is reported on your tax return, follow the rules for tax records. Utility bills can be discarded once the next bill is received showing the previous paid bill, unless you deduct utilities, such as for a home office.

Loan documents. Keep documents and proof of payment until the loan is paid off. After that, keep proof of final payment.

Insurance policies. Keep policy and payment documents as long as the policy is in force.

Auto records. Keep registration and title information until the car is sold. If you deduct auto expenses, keep mileage logs and receipts with your tax records. You might keep maintenance records for reference and to document services to a new buyer.

Medical records. Keep records indefinitely for surgeries, major illnesses, lab tests, and vaccinations. Keep payment records until you have proof of a zero balance. If you deduct medical expenses, keep receipts with your tax records.

These are general guidelines, and your personal circumstances may warrant keeping these documents for shorter or longer periods of time.

Personal Document Locator

A personal document locator is a detailed list of your personal and financial information that can assist others in the event of your death or disability. Typically, a personal document locator will include the following:

Securely Store Your Records

You can choose to keep hard copies of your financial records or store them digitally. You usually do not need to keep hard copies of documents and records that can be found online or duplicated elsewhere. Important documents such as birth certificates and other proof of identity should be stored in a safe place, such as a fire-resistant file cabinet or safe-deposit box. You can save or scan other documents on your computer, or store them on a portable drive, or use a cloud storage service that encrypts your uploaded information and stores it remotely.

An easy way to prevent documents from piling up is to remember the phrase "out with the old, in with the new." For example, if you still receive paper copies of financial records, discard your old records as soon as you receive the new ones (using the aforementioned guidelines). Make sure to dispose of them properly by shredding documents that contain sensitive personal information, Social Security numbers, or financial account numbers. Finally, review your records regularly to make sure that your filing system remains organized.

Is It Time to Buy an Electric Vehicle?

Record-breaking fuel prices may have you thinking about buying an electric vehicle sooner rather than later. All electric vehicles (EVs) or plug-in electric vehicles (PEVs), as they're also called, run on electric energy stored in a rechargeable battery rather than on fuel. Plug-in hybrid electric vehicles (PHEVs) that can run on either type of power are also popular. The market is evolving quickly: 126 additional hybrid and EV models were introduced between 2020 and 2021, and U.S. sales nearly doubled.[1]

Cost and Battery Range

Saving money at the pump and benefiting the environment will generally cost more upfront, in part because of high battery and production costs. Prices are likely to rise in the short term, too, as demand and raw material costs increase. However, maintenance costs may be lower because EVs have fewer moving parts. And the more you drive, the more your energy savings could add up.

Tax credits or incentives may help offset the cost of purchasing a new electric or hybrid vehicle. Starting in 2023, an updated tax credit of up to $7,500 will be available for the purchase of new clean vehicles, including some EVs and PHEVs. There is also a new tax credit of up to $4,000 for some pre-owned EVs purchased from a dealer.

Check on credit availability before you buy, because not all vehicles will qualify, and you may not be eligible to claim the tax credit (income limits apply). Tax credits and other incentives may also be offered at the state or local level. You can find more information about tax credits and incentives at fueleconomy.gov.

A special concern for EV shoppers is battery range. Fortunately, most EVs can easily handle daily driving, with typical driving ranges of 150 to 400 miles on a single charge.[2] Vehicles can charge at home via a standard outlet, but you may opt to pay an electrician to install a high-powered charger to greatly increase charging speed (incentives or rebates may help offset the cost). You'll also want to consider the availability of public charging stations; networks are expanding rapidly, but are still not found everywhere.

Get in Line

Like their gas-powered counterparts, EVs come in many makes and models, including cars, crossovers, sports utility vehicles, and trucks. To find your favorites, read reviews and test drive if possible. Once you're serious about buying, one way to ensure you're in line to purchase the model you want is to get on a manufacturer's waiting list, though there may be a fee. Wait times will likely fall as more manufacturers ramp up production and new models are introduced. So if you decide not to buy an EV now or can't find one in stock, you should have plenty of opportunity to buy one not too far down the road.
