RISK

Which of the statements below best describes your purposes for your investment accounts?	
	<i>I want to minimize potential declines and significant fluctuations in the value of my account by investing in lower risk, more conservative investments.</i>
	<i>I want a moderately high level of income (interest and dividends) from the account, with some modest growth opportunity over the long-term</i>
	<i>I prefer a balance of income (interest and dividends) with longer-term growth.</i>
	<i>My primary goal is to maximize the value of my account as much as possible over a long-term timeframe.</i>
When will you begin drawing money from this specific investment account?	
	<i>10+ years</i>
	<i>5-10 years</i>
	<i>3-5 years</i>
	<i>1-3 years (for supplemental income needs, such as retirement)</i>
	<i>I plan on immediately withdrawing money from this account</i>
Over the next several years, you expect your annual income (salary, rental properties, pensions, social security, etc.) to:	
	<i>Stay about the same</i>
	<i>Grow moderately</i>
	<i>Grow substantially</i>
	<i>Decrease moderately</i>
	<i>Decrease substantially</i>

Which of the five sample portfolios to the right represent your goals for your investment accounts and the most acceptable range of outcomes over a 1 year period? The figures presented are hypothetical and do not represent actual returns of an investment portfolio. No guarantee is made regarding future performance.

Portfolio A: Average Return 4% Best Return 18% Worst Return -8%

Portfolio B: Average Return 5% Best Return 28% Worst Return -21%

Portfolio C: Average Return 7% Best Return 39% Worst Return -30%

Portfolio D: Average Return 8% Best Return 53% Worst Return -39%

Portfolio E: Average Return 10% Best Return 67% Worst Return -47%

If your investments were to decline in value significantly over a 3 month period, how might you react?

I would consider this decline as an opportunity to add to my investments

Because I invest for long-term growth, I can accept temporary fluctuations

Although I invest for long-term growth, a short-term decline would concern me

I would be very concerned because I can't accept my account losing value

In recent years, how have your personal investments changed?

My investments have shifted towards lower risk, lower return profile

No meaningful change in the risk profile of my investments

I have shifted my investments towards a higher risk, higher return profile
