

Is Your 401 (k)?

Could you be doing a better job managing your 401(k)?

Your 401(k) account may be central to your retirement planning. So if you lack the time, tools or confidence to manage your account in accordance with your retirement goals, we can help solve your problem.

Let the professionals do it for you.

Our partners at Retirement Management Systems (RMS), can manage the company-sponsored 401(k) account you have now. We'll assess your retirement goals and investment tolerance and help develop your retirement strategy. Then RMS will review the investment alternatives in your employer's plan and actively execute your strategy.

A path to retirement.

People who fly solo with their 401(k) could be too conservative, too aggressive, or simply let emotions get in the way of making smart investment decisions. But you don't have to go it alone.

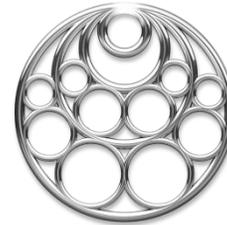

Unified Wealth & Retirement Planning will help you...

- Determine how much to save from each paycheck
- Monitor progress toward your goals
- Understand the risk you are taking, in real terms you can understand

While Retirement Management Systems...

- Chooses a prudent investment mix for your needs
- Allocates current balances and future contributions
- Rebalances and reallocates as necessary

Retirement Management Systems (RMS) is a Registered Investment Adviser that provides allocation and rebalancing services for employer sponsored retirement accounts. Unified Wealth & Retirement Planning does not provide advisory services on qualified plan accounts, but may provide other investment advisory and financial planning services as an investment advisor representative of Brookstone Capital Management, a Registered Investment Adviser. Unified Wealth & Retirement Planning, RMS, and Brookstone Capital Management are separate and unrelated companies. Investors need to be aware that no investment plan or asset allocation strategy can eliminate the risk of fluctuating prices and uncertain returns.
