

Portfolio Analysis (Sample Portfolio vs Benchmark)

Benchmark: Recommended Benchmark
- Conservative Plus

Client Name: Sample Portfolio

Prepared By: Private Client Group

Systematic Risk:

This risk is inherent to the entire market. It is **difficult to eliminate**. However, it is **measurable and is highly correlated with returns**. Investors whose portfolios have more systematic risk are generally afforded an opportunity to earn higher returns over time.

Factor risk exposures include equity risk premium, credit, duration, size, valuation, momentum, and quality.

Investment Growth

Time Period: 1/1/1999 to 12/31/2023

Risk and Return

Time Period: 1/1/1999 to 12/31/2023

	Return	Standard Deviation
Global 20-80 (Conservative)	3.88	6.10
Global 40-60 (Conservative Plus)	4.65	7.38

Standard Deviation 3 Yr **9.30**

Asset Allocation

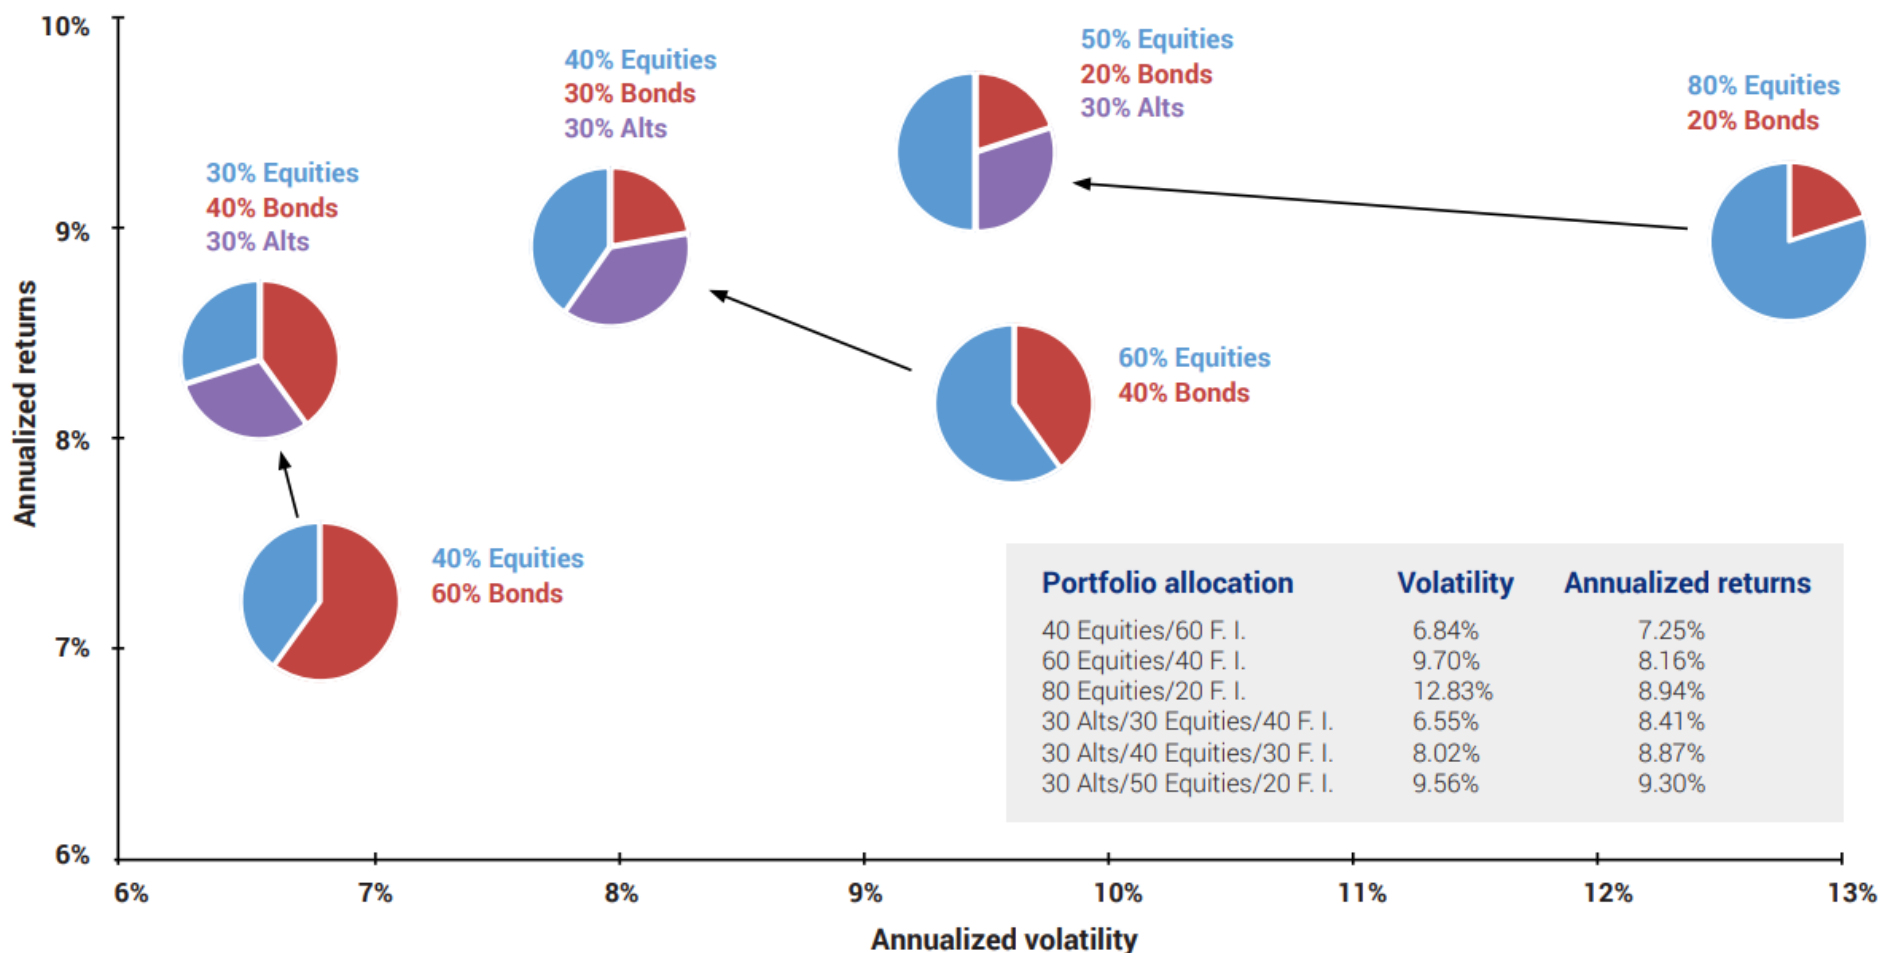

Diversification (Seeking the Efficient Frontier):

We can seek to make portfolios more "**efficient**" by combining dissimilar assets in an attempt to: (1) maximize the expected return at any level of expected risk (volatility), or (2) to minimize the expected risk (volatility) needed to achieve a targeted rate of expected return.

Alternatives and portfolio risk/return

Annualized volatility and returns, 1989 - 3Q22

Source: Bloomberg, Burgiss, FactSet, HRFI, NCREIF, Standard & Poor's, J.P. Morgan Asset Management. Alts include hedge funds, real state and private equity, with each receiving an equal weight. Portfolios are rebalanced at the start of the year. This slide comes from our [Guide to Alternatives](#). *Guide to the Markets - U.S.* Data are as of June 30, 2023.

Sector Exposure

Risk Factors (Smart Betas):

Fundamentals like **valuation**, **size**, **profitability**, **credit**, and **interest rate risk** have historically been sources of excess return. Academics believe these are forms of risk which have risk premiums associated with them. They can be measured and estimated with statistical regressions. They are often used to estimate and improve expected returns. They can also be used to create enhanced indices.

Dimensions of Expected Returns

Illustrative index performance: annualized compound returns (%) in US dollars

Past performance is no guarantee of future results. Actual returns may be lower. Indices are not available for direct investment; therefore, their performance does not reflect the expenses associated with the management of an actual portfolio. In USD. Bars are represented by the following indices, in order: Dimensional US Small Cap Index, S&P 500 Index, Dimensional International Small Cap Index, MSCI World ex USA Index (gross div.), Dimensional Emerging Markets Small Index, MSCI Emerging Markets Index (gross div.), Fama/French US Value Research Index, Fama/French US Growth Research Index, Fama/French International Value Index, Fama/French International Growth Index, Fama/French Emerging Markets Value Index, Fama/French Emerging Markets Growth Index, Fama/French US High Profitability Index, Fama/French US Low Profitability Index, Fama/French International High Profitability Index, Fama/French International Low Profitability Index, Fama/French Emerging Markets High Profitability Index, Fama/French Emerging Markets Low Profitability Index. Securities offered through Equitable Advisors, LLC (NY, NY 212-314-4600), member FINRA/SIPC (Equitable Financial Advisors in MI & TN). Investment advisory products and services offered through Equitable Advisors, LLC, an SEC registered investment advisor. Annuity and insurance products offered through Equitable Network, LLC, which conducts business in CA as Equitable Network Insurance Agency of California, LLC, in UT as Equitable Network Insurance Agency of Utah, LLC, in PR as Equitable Network of Puerto Rico, Inc. Individuals may transact business, which includes offering products and services and/or responding to inquiries, only in state(s) in which they are properly registered and/or licensed. For more information about Equitable Advisors, LLC you may visit <https://equitable.com/crs> to review the firm's Relationship Summary for Retail Investors and General Conflicts of Interest Disclosure.

Private Client Group is not a registered investment advisor and is not owned or operated by Equitable Advisors or Equitable Network. Private Client Group, Equitable Advisors and Equitable Network are not affiliated with Morningstar Investment Research.

S&P® is a registered trademark of Standard & Poor's Financial Services LLC.

Indices, such as the S&P 500, are unmanaged portfolios of specified securities. Individuals cannot invest directly in an index.

Investments in bonds are subject to interest rate risk and can lose principal value when interest rates rise.

Investments in large-capitalization companies may involve the risk that larger more established companies may be unable to respond quickly to new competitive challenges.

Investments in mid-capitalization companies are generally less established and their stocks may be more volatile and less liquid than the securities of larger companies.

Investments in small-capitalization companies may be more vulnerable to adverse business or market developments than larger capitalization companies.

Investments in real estate involve risks such as refinancing, economic impacts, property value changes, operating expenses, and management skill dependency.

Investments in foreign securities may be subject to greater risks than U.S. investments, including currency fluctuations, less liquid trading markets, greater price volatility, political and economic instability, less publicly available information, and changes in tax or currency laws or monetary policy.

Investments in emerging markets are generally riskier than those that invest in developed countries.

Investments in sector specific stocks entails certain risks, including changes in: the economy, supply and demand, laws, and the possibility that the stocks of many of the companies in one sector will fall in price at the same time due to an event that affects the entire industry.

Investing in commodities, entails significant risks. The commodities markets may fluctuate widely based on a variety of factors including changes in supply and demand relationships; governmental programs and policies; national and international political and economic events; war and terrorist events; changes in interest and exchange rates; trading activities in commodities and related contracts; pestilence; weather; technological change; and the price volatility of a commodity. In addition, the commodities markets are subject to temporary distortions or other disruptions due to various factors, including lack of liquidity, participation of speculators and government intervention.
