WHY I DO THIS RADIO SHOW:

I had a brief discussion w/ a Snowmass Village shuttle driver who I believe was named Bob on Monday. I guess he recognized my voice. He told me that I am just as bad as the voices on the left in that I don't do anything to unite all of us. He went on to tell me that he is a democrat, and that I never present the other side's points. He inferred from his comments that by not representing the left's talking points that I am something of a liar

Let me tell you something about what I am trying to do here folks. I understand that all of us get bombarded with spin and lies from the left-wing-nut media 24-7-365. They speak in vagaries and generalities and that's when they aren't out-right lying. Don't believe me? Look at the Russian Collusion fleecing that went on for 4 yrs. I believe it is my responsibility to point out to you listeners FACTS that more often than not most of you probably haven't heard before. It is not my job to unite America; that's what Lyin' Joe Biden promised HE would do.

I also understand that socialists can never tell the truth about their polices; when they do, the electorate rebels. See Terry McCaulliffe in the VA Gubernatorial election last month when he stated that parents should have no input in their children's education. The former bag man for the Clinton Crime Family, like all good socialists, understands that kids must be wards of the state if they are to turn our capitalistic republic into a socialist wasteland. They've got to get em' early before the parents can intervene with values like freedom, liberty and property rights. Look at the Cornerstone school in Basalt for further proof that the left views your kids as wards of the state.

WESBURY:

Brian Wesbury wrote this week that the policies slithering out of this administration and Congress reminds him of the "stop-go" Keynesianism of the 1970s, where policymakers would whipsaw between goosing the economy through loose money and extra government spending, then battling the ensuing inflation by tightening monetary policy, slowing the growth of spending, or even by raising taxes. This

ping-pong policymaking was not healthy for the stock market: the S&P 500 increased at a 1.6% annual rate in the 1970s as consumer prices rose 7.4%.

He went on to say that In recent weeks, the stock market has decided the economic pain associated with an eventual tightening of fiscal and monetary policy is more likely to come sooner rather than later. Investors realize the budget deficit in the year ahead is likely to be much smaller than the past couple of years, which will be good for the long-run but could be an economic headwind in the near future.

FT PORTFOLIOS FACTOID:

A report from Drone Industry Insights estimates that the global drone market will grow to \$41 billion by 2026, according to U.S. News & World Report. The report notes that 1.4 million drones are expected to be sold in 2026, up from 828,000 in 2021. Brandessence Market Research & Consulting believes that North America will dominate the drone market through 2027. While the highest adoption of drones is expected to come from the energy industry, they are already used by the military, miners, farmers and Firefighters.

10 Best ski resorts:

according to the dopes at USA Today (I didn't know they were still in business):

Winter park is no.1? They do a GREAT job w/ handicap skiers and with Smartwool and FIS racing. But #1 ski resort?

The ski area that came in #10 should be at the top of their weird list; Revelstoke has 6,000 vertical and gets 500-700 inches of snow/yr. IF...and that's a big IF I am leaving Aspen Snowmass to ski, I'm headed to Revelstoke, B.C.

Uyger update:

"FROM your phone, TV and trainers to your clothes and Covid masks, anti-slavery campaigners have warned there's a very good chance part of them was made by political prisoners in China.

Activists have accused the Communist regime of being engaged in the world's biggest forced labour outrage since the Nazis."

What did the NAZI regime and "modern-day" China have in common? Well let's see, what did the National Socialist German Workers Party and the Chinese Communist Party have in common? Pretty simple: Socialism is communism's evil cousin.

"Look around your home and there is a very good chance something will have been made in cruel factories, which are staffed by Uyger inmates from nightmarish "gulag" style camps.

As much as 1/5 of all cotton production can be presumed to be linked to the forced labour.

Up to eight million people have gone through "training" at state "gulags".

OIL/ALL:

The WSJ reported this week Demand for Oil & Gas will Remain Robust for Years.

Many oil & gas companies boards of directors have been infested with green energy activists over the past decade.

As a result, the world's underinvestment in oil and gas since 2014—years in which international spending was 50% below historical norms—is leading global markets to an era of scarcity.

“For the first time in a long time, you’re seeing a buyer looking for a barrel of oil, as opposed to a barrel of oil looking for a buyer,”

Just a few weeks ago, some market observers had predicted crude prices could soon hit \$100 a barrel for the first time in seven years, on the back of a strengthening demand recovery and sluggish growth in oil supplies.”

WSJ POLLING:

A new WSJ poll...and understand this folks that while you might think that WSJ polling sounds like it might be really conservative in nature, that over the years I have found it to be more careful than conservative; in any event, their new poll shows that a whopping 63% of independent voters disapprove of Joe Biden, while 29% approve. That same percentage, 63% also say the country is on the wrong track.

Pretty ominous numbers if you are running on the DNC ticket next year!

Mutations:

Which part of the Covid virus attaches itself to our Ace 2 receptors in our respiratory systems?

Obviously, it is the spike protien. If you remember, the Covid 19 virion is 95 nm long. There are 1 byn nm/meter. The spike protien is 10 nm, which represents about 12% of the whole virus strand. So what?

HE/SHE/THEY:

The Party of Science (the POS) has identified some 64 genders...which would be real news for all 4 of my deceased grand parents. Today we are simply going to discuss men vs women in sports. A male...aka a boy reaches 100% of testosterone production between ages 14-15, and maintains that testosterone

production thru age 35. The prime muscle building years for a male are between ages 15-25. On avg., males have 73 lbs of muscle mass vs females who 46.2 lbs of muscle mass.
