

## FULL MOTION

Cartilage is the slippery tissue that covers the ends of bones in joints, and healthy cartilage allows the bones to smoothly glide over one another without joint pain and discomfort. Every movement your body makes is a miracle of motion, an amazing combination of your joints working together so you can enjoy a life of easy activity. But when your joints ache, your life gets put on hold.

Glucosamine is the primary building block of joint cartilage. It is naturally produced in the body from glucose and the amino acid glutamine. Scientists believe that as the body ages, its capacity for producing glucosamine and ultimately cartilage, declines. The loss of glucosamine production combined with an increase in demand due to physical activity and age, can result in pain, stiffness, and loss of mobility. NeoLife's Full Motion provides 1500mg of glucosamine, the dose used in studies and shown to reduce pain and stiffness.

#2505 – 90 tablets

### Why a glucosamine supplement?

- **Prevent cartilage damage.** Glucosamine is the building block of proteoglycan, one of the main structural components of cartilage. Studies show that glucosamine stimulates cartilage cells (chondrocytes) to produce proteoglycans, thus normalising cartilage metabolism and keeping it healthy.
- **Slow down the breakdown of cartilage.** Studies have shown that glucosamine may inhibit the activity of enzymes responsible for the breakdown of cartilage. Glucosamine may also have anti-inflammatory action.
- **Help build, repair and regenerate cartilage.** Studies have shown that glucosamine can stimulate chondrocytes to begin producing healthy new cartilage matrix. Glucosamine has been shown to stimulate the regeneration of experimentally-induced cartilage damage.
- **Reduce pain and immobility.** Many studies have shown the effectiveness of glucosamine in relieving pain. Studies show that joint tenderness and restriction of movement also improve with glucosamine supplementation.
- **Glucosamine is quickly and efficiently absorbed** from the intestinal tract and is rapidly incorporated into joint cartilage. Studies using tagged glucosamine to allow scientists to follow the compound through the subjects' bodies, found that glucosamine did indeed travel to the joints and incorporated itself into the cartilage to help stimulate new cartilage growth.

### Why NeoLife's Full Motion?

- **Provides 1500mg of glucosamine**, the dose used in studies shown to reduce pain and stiffness.
- **Pharmaceutically pure, biologically functional glucosamine** from Glucosamine Hydrochloride – easy to digest and sulphite-free – minimising digestive discomfort and allergic reactions.
- **High-quality source of purified glucosamine.**
- **Herbal Comfort Complex**, an exclusive blend of Bromelain, White Willow and Boswellia, ingredients strongly associated with the body's natural mechanisms for minimising joint pain and inflammation.
- **Regenerative Mineral Complex**, an exclusive blend of synergistically critical Zinc, Boron and Silica, key minerals for joint health.
- **3D Advantage**, which provides optimal bio-availability through maximum Disintegration, Dissolution and Dispersion.
- **Formulated under the direction of the SAB using leading-edge science.**
