Advisory Board

#2061 – 500ml

How is Wash 'n Wax Unique?

Cleans, protects and shines all in one. Enhances paintwork which becomes glossier with every wash.

Requires a minimum amount of drying, leaving a fine protective coat. Protection will last between normal wash sequences. Doesn't streak.

How it Works:

A dual surfactant system specially formulated for maximum non-abrasive cleaning and protection.

A small dose of this highly concentrated product, mixed in cold water, displays excellent foaming properties.

Excellent water barrier properties and increased run-off due to a protective silicone film.

Reduced oxidation (rusting) due to this silicone protection.

Why Use Golden's Wash 'N Wax?

- **Economical.** Use 1 capful in 6 litres of water. Each bottle completes 100 car washes!
- **Versatile.** Can be used on tiles, ovens, grills and floors as well as other useful household applications.
- **Biodegradable.** Formulation ensures ingredients break down to their basic constituents by biological activity.

How to use Wash 'n Wax

■ Car:

Hose car down thoroughly to remove surface dust. Pour 1 capful (5ml) Wash 'n Wax in a bucket. Add 6 litres of water at full pressure to promote suds formation. Rinse vehicle off with water and then dry with a chamois.

■ Ovens, Freezers, Tiles and Shower walls:

After thorough cleaning with Golden's highly effective Super 10 cleaning agent (1:3), wipe surfaces dry. Apply Wash 'n Wax, mixed 1 cap (5 ml) with approximately 5 litres of cold water.

This helps to prevent a build up of grease in ovens, ice in freezers and body oils on shower tiles. Makes cleaning easy for the next time.

■ Precautions:

Keep out of reach of children. Do not ingest (drink).
