

BOTANICAL BALANCE

Balancing the uptake and utilisation of glucose is one of the most important physiological processes of the body as glucose is a key fuel. If too little glucose is available at any given time it undermines health and vitality by compromising cellular energy production; thus the function of critical tissue, organs and systems within it. Too much glucose on the other hand can react with and harm body tissues and disturb the body's natural fat storage systems; inducing unhealthy weight gain, increasing risk of cardiovascular and other chronic disease and ultimately disrupting or even destroying portions of the circulatory system, putting the entire body at risk. Throughout our lives maintaining healthy, effective glucose balance is vital. For an increasing portion of people, the ability to maintain glucose balance and control has been compromised. According to the International Diabetes Federation (IDF), the proportion of people with type 2 diabetes is increasing in most countries.

Neolife Scientific Advisory Board

#2514, 120 Tablets

Statistics from the IDF - Africa Region show the current prevalence and projected increase of prediabetes and diabetes amongst adults in Africa:

2019	2045
Living with Diabetes - 19 million	Living with Diabetes - estimated 47 million
Prediabetes - 45 million	Prediabetes - estimated 110 million

Currently, 60% of adults with diabetes do not know that they have it, which makes the IDF Africa Region one with the highest percentage of undiagnosed people of all IDF regions.¹

To address this epidemic, the Neolife Scientific Advisory Board has created a safe, drug free, blood glucose support product. This unique and exclusive combination of the bioactive botanicals: cinnamon, turmeric and curcumin, combined with chromium and alpha-lipoic acid, delivers broad, evidence-based support for normal healthy glucose balance. Formulated to work with the body's own natural biochemistry, Neolife Botanical Balance represents yet another example of how our understanding of carbohydrate metabolism enables us to produce products that can contribute to lifelong health and vitality.

Why a Glucose Balance Supplement?

- To help support healthy glucose levels in the body.
- To support normal pancreatic function for healthy insulin levels.
- To maintain normal insulin activity.

BOTANICAL BALANCE

Why NeoLife Botanical Balance?

- NeoLife's exclusive Botanical Blend provides powerful whole-food botanical ingredients; cinnamon, curcumin and turmeric proven with leading-edge modern clinical science to support healthy glucose levels.
- Cassia cinnamon is the most studied and proven effective form for supporting healthy glucose metabolism and healthy blood glucose levels. In addition cinnamon has been shown to support normal insulin production and sensitivity and promote cellular glucose uptake.
- Curcumin is the most bioactive phytonutrient component of turmeric; curcumin provides antioxidants and is used to help relieve inflammation.
- Turmeric is an antioxidant phytonutrient that provides a broad spectrum of curcuminoids and helps to balance inflammation.
- Provides chromium from yeast, the most bioactive form. Chromium helps the body metabolise carbohydrates and fats and provides support for healthy glucose metabolism. It is a critical co-factor with insulin and helps maintain normal cellular responsiveness.
- Alpha-lipoic Acid helps protect against damage caused by free radicals. It also helps support normal blood sugar levels and the cells' ability to utilise insulin.
- 100% Vegan
- GMO-free ingredients are used
- NeoLife Botanical Balance uses a proprietary Botanical Blend of whole-food ingredients known to support normal blood glucose balance by:
 1. Maintaining blood glucose within the normal range
 2. Supporting healthy and normal insulin action
 3. Promoting whole body glucose management
