Flexible & Comfortable Joints

Adequate intake of omega-3s promotes a healthy balance of inflammatory and anti-inflammatory forces throughout the body and specifically in the joints, thereby promoting comfort and flexibility.4

Prenatal Nutrition

Increased intake of omega-3 fatty acids during pregnancy has been associated with better brain and vision development of the baby.5

Eye Health

Fish oil intake has been associated with improved eye health and vision. In fact, recent studies suggest that omega-3 fatty acid consumption may help preserve long-term health of the macula.6

The World Health Organization (WHO), the Centers for Disease Control and many other leading health authorities agree—increasing the omega-3 fatty acid content of the diet is a critical component in helping to solve the chronic disease epidemic that the world is facing.

Heart Health

According to the Journal of the American College of Cardiology, everyone needs omega-3’s every day. The American Heart Association (AHA) recommends eating two servings of fish rich in omega-3 fatty acids each week to reduce the risk of heart disease†, but since many are not able to do this, the AHA now recommends taking fish oil supplements to get enough of these important nutrients. Research has also shown that taking omega-3 fatty acids can help retain normal blood pressure and triglyceride levels.2

Brain Health

Recent research has shown that fish-derived omega-3 fatty acids are vital to brain development and function at every stage of life, as well as long term brain health. High omega-3 diets have been shown to lead to a marked increase in mental performance and IQ scores and help retain better cognitive function over time.3

THE BENEFITS OF OMEGA-3 FISH OIL

THE PROBLEM:

ARE YOU GETTING ENOUGH AND IS IT THE BEST?

Although many people are trying to increase their fish consumption, population surveys show that we are still not getting enough. In addition, many are concerned about the presence of contaminants such as mercury, lead and polychlorinated biphenyls (PCBs) in fish.

NeoLife Omega-3 Salmon Oil Plus is the world’s finest ultra high potency fish oil, complete with standardised amounts of all eight omega-3s, with guaranteed purity.

**Ultra Pure**

We use only the highest quality salmon from pristine North Atlantic waters. Proprietary molecular differentiation process concentrates beneficial omega-3s using cold processing. The final product is screened for over 200 potential contaminants, such as mercury and lead, with an allowable detection limit of ZERO. This sophisticated process also helps reduce fishy taste and smell.

**Potential & Full Spectrum**

Each 3 capsules serving of our exclusive UHPO3 (Ultra High Potency Omega-3) formula provides standardised amounts of all eight naturally occurring omega-3s involved in human nutrition. This allows all members of the omega-3 family to work together as nature intended, optimising benefits and promoting the natural regenerating process.

**Whole Food**

Omega-3 Salmon Oil Plus is based on pure salmon oil, providing all the benefits and whole food goodness of one of nature’s richest sources of omega-3 fatty acids. NeoLife products use only GMO-free ingredients.
