

# SENIOR FRONTEND DEVELOPER

Engineering - Toronto, ON Canada

I Am Action is seeking an experienced engineering professional who will become a valued member of our engineering team, responsible for core engineering activities. This is a senior role within one of the world's most innovative start-ups. You will be at the heart of our mission to create large-scale social change.

In this role, you will primarily be responsible for writing robust, reliable, and well-tested code. You will also be asked to weigh in on architectural decisions, mentor junior members of the team, and help to optimize our development processes.

This is an excellent opportunity for someone who is looking to keep their hands in the code, while also getting the opportunity to showcase technical leadership. An ideal candidate is someone with an "all hands on deck" attitude and an appetite for big challenges.

## KEY RESPONSIBILITIES

- Take ownership of projects through the entire development process, including all inputs and outputs of your work
- Work on all levels of the stack
- Take on new challenges in a scalable and reliable way
- Take pride in maintaining code that is robust and well organized
- Take an active role in growing and managing the engineering team

## QUALIFICATIONS

- Experience working in a full-stack Ruby on Rails environment
- Thorough working knowledge of Javascript, HTML, CSS, and SASS
- Well versed in the current landscape of front-end technologies, including package management systems such as NPM and Gulp
- Ability to write comprehensive automated tests for web pages considered an asset
- Must be able to navigate a development environment using Git
- Familiarity with popular agile processes
- Effective communicating over a variety of channels, including email, ticketing systems, and face-to-face
