

Overview

Lending Club (NYSE:LC) is the world's largest online credit marketplace, facilitating personal loans, business loans, and financing for elective medical procedures and K-12 education and tutoring. Borrowers access lower interest rate loans through a fast and easy online or mobile interface. Investors provide the capital to enable many of the loans in exchange for earning interest. We operate fully online with no branch infrastructure, and use technology to lower cost and deliver an amazing experience. We pass the cost savings to borrowers in the form of lower rates and investors in the form of attractive returns. We're transforming the banking system into a frictionless, transparent and highly efficient online marketplace, helping people achieve their financial goals every day.

History & Milestones

- President & CEO: Scott Sanborn
- Headquartered: San Francisco
- Established: 2006
- First personal loan facilitated: May 2007
- Launch of small business loans: March 2014
- Launch of education financing and patient financing: April 2014 (acquisition of Springstone Financial)
- IPO: December 11, 2014

Lending Club was founded on the premise that an online marketplace would offer an efficient and transparent experience for borrowers at lower operating costs. Lending Club utilizes technology to lower costs and deliver a better consumer experience. We measure the quality of the experience we deliver by monitoring the net promoter score (NPS)* of our customers: borrowers for example have shown a NPS consistently up in the 70s since we began surveying borrowers in January 2013, which places us at the upper end of customer satisfaction ratings for financial services where the average NPS is in the 20s.

How It Works

Making Credit More Affordable

Joe doesn't want to keep the moving expenses he's just incurred on his credit card, where he's charged an 18% APR. He decides to check his rate with Lending Club. The marketplace's risk ranking algorithm assigns an APR that Joe finds appealing. His loan is listed anonymously on our marketplace, where hundreds of investors each invest in a \$25 fraction of the loan. A fixed monthly payment of principal and interest is automatically deducted from Joe's bank account; 36 months later, he's paid off his loan.

Making Investing More Rewarding

Jane doesn't like the volatility of the stock market or the 0.45% APY she's earning on her "high yield" savings account. She decides to open an account online with Lending Club, which only takes a few minutes, and transfers money into her account. Jane can build her portfolio by choosing loans individually or use our automated investing service. Jane creates a portfolio of hundreds of loan fractions. Jane receives monthly payments, after deduction of a service fee, which she can take as cash or reinvest.

Performance

Annual platform loan facilitation:

2007: \$4.8 million
 2008: \$20.0 million
 2009: \$51.8 million
 2010: \$126.4 million
 2011: \$257.4 million
 2012: \$717.9 million
 2013: \$2.06 billion
 2014: \$4.38 billion
 2015: \$8.36 billion

Q1 2016: \$2.75 billion
 Q2 2016: \$1.96 billion

2016 YTD: \$4.71 billion

Annual operating revenue:

CY 2007: nm
 CY 2008: nm
 CY 2009: \$1.4 million
 CY 2010: \$5.7 million
 CY 2011: \$12.5 million
 CY 2012: \$34.0 million
 CY 2013: \$98.0 million
 CY 2014: \$213.4 million
 CY 2015: \$426.7 million

Q1 2016: \$151.3 million
 Q2 2016: \$102.4 million

2016 YTD: \$253.7 million

Standard Program Personal Loan Borrowers (through 6/30/2016)	Average loan size: over \$14,844 Average FICO: 699 Average Income: over \$76K Loan purpose: 74.56% of borrowers report using their personal loans to refinance existing loans or pay off their credit cards. APRs: 5.99% to 35.89%** Fees: one-time origination fee of 1% - 6% depending on loan grade (included in APR and subtracted from loan proceeds prior to disbursement)** Borrowers who received a loan to consolidate existing debt or pay off their credit card balance reported that the interest rate on the loan they received through our marketplace was, on average, 6.6 percentage points lower than they were paying on their outstanding debt or credit cards, reducing their rates by 33%.*** Based on a review of the credit performance of borrowers who received a loan from January 1, 2013 and March 31, 2015 to consolidate existing debt or pay off their credit card balance, 75% of borrowers experienced an average increase of 20 points in their FICO score within three months after obtaining their loan, which we believe is in part attributable to a reduction in interest rate and a reduction in the borrower's total revolving balance.
Standard Program Personal Loan Investors (through 6/30/2016)	Historical returns by Grade A-C of 5.29% to 8.31%**** Fees: Lending Club charges a servicing fee to investors for servicing loans, processing payments, collections activities, and maintaining accounts. The servicing fee paid by investors is one percent (1%) of borrower payments rounded to the nearest whole cent or one cent. Lowest investment increment: \$25
Interest Rates	Average interest rate, 36-month loans (Q216): 11.37% Average interest rate, 60-month loans (Q216): 15.53% Average interest rate, all loans (Q216): 12.76%

*** Based on responses from 6,169 borrowers in a survey of 29,309 randomly selected borrowers conducted from April 1st, 2016 to June 30th 2016. Borrowers who received a loan to consolidate existing debt or pay off their credit card balance reported that the interest rate on outstanding debt or credit cards was 20.7% and average interest rate on loans via Lending Club is 13.8%.

**** As of June 30, 2016 for loans issued prior to September 30, 2014. To be included in the Historical Returns calculation, a Note must have been originated prior to September 30, 2014. Historical Returns are Lending Club's adjusted net annualized returns (Adjusted NAR) for Notes with Grades A through C. Adjusted NAR is calculated using the formula described [here](#). Adjusted NAR is based on monthly borrower payments actually received net of Lending Club's service fees, actual charge offs, recoveries, and adjustment for estimated future losses. To estimate future losses, we apply a loss rate estimate to the outstanding principal of any loans that are past-due but not charged off. The loss rate estimate is based on historical charge off rates by loan status over a 9-month period. Historical Returns are not a promise of future results. Lending Club Notes are not insured or guaranteed and investors may have negative returns. Individual portfolio results may be impacted by, among other things, the diversity of the portfolio, exposure to any single Note or group of Notes, as well as macroeconomic conditions. Notes are offered by [prospectus](#) filed with the SEC and you should review the risks and uncertainties described in the prospectus prior to investing in the Notes.
