

ENGINEERING INTERNSHIP

OptimumG is always on the lookout for passionate engineers who will be a positive asset to our team. If you are interested in a 12-month internship with OptimumG, please follow the directions below and we will consider your application as soon as possible.

Benefits

- Very exciting work & the opportunity to work in the racing industry.
- Opening the door on the racing world and entry into the profession.
- "Start Up" spirit of small, young, ambitious and innovating business. No bureaucracy. Upfront, direct participation expected of all people in the company.
- Benefits matching the risks and the completion of designated objectives. You will be given much more responsibility and therefore gain much more experience than you would in a large corporation.
- Long term possibility of employment in the competition business and work in the United States, Australia, South America, India, China and/or Europe.

How to Apply

Prior to an interview send a CV or resume to engineering@optimumg.com along with a letter describing clearly, sincerely and giving verifiable details in the following:

- What are your character traits that make you a unique and different person?
- Your motivation and your interest in this position.
- Your practical experience (Both software and motorsport specific)
- The extent of your theoretical knowledge/education.
- A description of the jobs that your knowledge and experience allowed you to complete satisfactorily. DO NOT say that you know how to use such and such software. Instead, give examples of jobs completed by you. Describe quantitatively what their objectives were, if you reached them (and if not why), and if you worked alone or with a team.
- In what way will your participation in this company add to the knowledge, the know-how and the identity of OptimumG?
- Some additional things to keep in mind when writing the letter:
 - Do you have any examples of you work you can send us?
 - What is your practical, hands-on experience?
 - Tell me what your thesis or project(s) have been /or will be (or what you would like it to be) about?
 - Are you good with Matlab, Visual Basic or a drawing software? Do you have examples you can send us?
 - Are you ready to work 60 hours a week? Are you ready to come to Denver for 12 months?
 - What is your practical, hands-on racecar experience
 - What would you like to do in racing; Research, Simulation, Testing, etc.
 - What is the part of the racing engineering technology that interests you Engine, Aero, Brakes, Data Analysis, etc.

Also, please include at least two references along with your application.
