## Vaccines

Vaccinations should be administered according to each pet's individual lifestyle and health status. There are many options when it comes to vaccinating (or not vaccinating) so don't hesitate to ask questions. The following lists our recommendations for core vaccines. There are other non-core vaccines available for pets whose lifestyles indicate the need.

### **Feline vaccine schedule:**

- 6 wks: Distemper plus Calici (FVRCP)
- 9 wks: Distemper plus Calici (FVRCP)
- 12 wks: Feline Leukemia/Feline Immune Deficiency Virus test (FeLV-FIV) followed by the Feline Leukemia/Distemper plus Calici (FeLV-FVRCP) combo if test is negative
- 16 wks: Feline Leukemia/Distemper plus Calici (FeLV-FVRCP) and Rabies
- 68 wks: Feline Leukemia/Distemper plus Calici (FeLV-FVRCP) and Rabies
- FeLV-FVRCP should be boosted annually and Rabies every 3 years

FVRCP = Feline Viral Rhinotracheitis, Calicivirus, Panleukopenia  
FeLV = Feline Leukemia Virus

### **Canine vaccine schedule:**

- 6 wks: Parvo Distemper (DA2PPV) + Corona
- 9 wks: Parvo Distemper (DA2PPV) + Corona
- 12 wks: Parvo Distemper (DA2PV) ± Bordetella
- 16 wks: Parvo Distemper (DA2PV) + Rabies
- 42 wks: Bordetella
- 68 wks: Parvo Distemper (DA2PV) + Rabies + Bordetella
- Bordetella should be boosted every 6 month, DA2PV annually and Rabies every 3 years

DA2PPV + Corona = Canine Distemper, Adenovirus Type 2, Parainfluenza, Parvovirus, Corona Virus

DA2PV = Canine Distemper, Adenovirus Type 2, Parvovirus

Bordetella (Intranasal) = Bordetella, Canine Parainfluenza, Canine Adenovirus Type 2
