PRE-SURGERY/PROCEDURE INFORMATION

- Do not let your pet eat after 10 pm the day prior to procedure/surgery.
- **Pre-Surgical Bloodwork** is RECOMMENDED for any pets undergoing anesthesia. The results of these tests will serve as reference values for the future should your pet become ill as well as indicate any illness or early disease detection. We will discuss these with you upon check-in.
- The surgery price includes the surgery, anesthesia, surgical IV catheter & fluids and medication for pain control.
- To maintain, we will shave hair at both the IV site and surgery sites.
- If your pet is receiving a dental cleaning and needs tooth extractions, extractions will be performed while your pet is under anesthesia.
- A current Rabies Vaccine as well as DHPP/Feline FVRCP is required for your pet to be in the hospital.
- Any fleas found will be treated at owner's expense with Capstar.
