If you are dropping off your pet for any reason, all patients must be current on vaccines. All dogs must have a current Rabies vaccine, fecal, Distemper/Parvo/Leptospirosis vaccine given within the last year, and a Bordetella vaccine given within the past six months. All cats must have a current Rabies vaccine, Distemper vaccine and fecal within the past year. If any internal and/or external parasites are found, your pet will be treated at your expense. We do require your cat to have a history of a negative FIV/FELV combo test before they can board in our facility.

ALL FEES ARE DUE AT THE TIME OF SERVICE!

We accept cash, debit, and all major credit cards. We will gladly accept Care Credit for amounts equal to \$500 or more. We no longer accept checks! An estimate for care will be provided for all emergencies, hospitalizations, surgeries, in any cases that require extensive treatment, or upon your request. A deposit prior to some treatment may be required.

BOARDING POLICY

We require a signed estimate and full pre-payment of any surgical or dental procedure to be performed during the boarding reservation. Any boarding in conjunction with a surgery or dental will include an additional fee of \$5/night for each night of post-operative care. If a surgery or dental is scheduled during boarding and sharing with another pet, they will be separated into two kennels post surgery.

We require pre-payment in full for all holiday boarding at the time the reservation is made. If the holiday reservation is cancelled within 3 days or less of the reservation date, we will deduct 1 night of boarding per pet from the deposit before refunded.

All boarding reservations made longer than 1 week will require a deposit of half the total boarding cost before checking in for boarding.
