PRE-ANESTHETIC BLOOD PANEL CONSENT

Like you, our greatest concern is the well-being of your pet. We recommend a pre-anesthetic blood profile to be performed in order that we may maximize patient safety and inform the doctor in the presence of dehydration, diabetes and/or kidney or liver disease which could complicate the procedure. These conditions may not be detected unless a pre-anesthetic profile is performed.

Recommended for all surgical patients

Cost \$40.50

Includes: BUN and Creatinine (kidney)

ALKP and ALT (liver)

Glucose (blood sugar)

Total Protein (hydration)

Yes, please complete the blood work you recommended prior to surgery on my pet.

Date

No, thank you. I have elected to **refuse the recommended pre-anesthetic blood work** at this time and request that you proceed with anesthesia. I assume full financial responsibility for this/these animal(s). I understand there are always potential risks when using anesthesia or performing surgery on an animal.

POST SURGICAL PAIN MANAGEMENT CONSENT

We are excited to offer a new service to our surgical patients. If you choose post-surgical pain management, we will administer pain management to your pet before he/she wakes up. Our class IV therapy laser uses a beam of laser light to deeply penetrate tissue without damaging it. Laser energy induces a biological response in the cells which leads to **reduced pain, reduced inflammation, and increased healing speed**. This is a **drug free, non-invasive** approach to pain management and has been scientifically proven to be successful in treating post-surgical pain. **Cost \$16**

Yes, please use the therapy laser to reduce pain and speed healing of my pet.
