

Cheese Carving 101

What's **cheesier** than a heart carved out of cheese?! Follow these three simple steps to create your own:

STEP 1. Gather your tools

- Ceramics tools or kitchen tools (cutting board, small knives, graters)
- A cheese wire
- An x-acto knife
- A ruler

STEP 2: Select your cheese

- Use any semi firm or firm cheese.

STEP 3: Get carving!

- Lightly sketch the design on the block of cheese.
- Cut away larger chunks with a knife to get the general shape and continue taking away cheese, using the smaller tools, to refine the shape.
- Add details using an x-acto knife.

TIPS:

- You can always eat your mistakes!
- Store any leftover pieces or scraps in an airtight container or bag for cooking later.
