

Do you need a round or elongated toilet seat?

- On your toilet bowl measure the distance from the **center of the seat bolt holes** to the **outside front** of the bowl.
- Standard round toilet bowls measure about 16 ½ inches, so you would need a round toilet seat.
- Standard **elongated** toilet bowls measure about 18 ½ inches, so you would need an elongated toilet seat.

How to measure your toilet bowl hole spacing:

Measure the distance from the center of each toilet bowl bolt hole. The above illustration shows a standard 5 ½ inches hole spacing.
