

# Part 5 of Three Months in a Row Video Series is Out!

The WLC team is happy to announce the release of part 5 of this most important Three Months in a Row video series. For three months in a row powerful evidence was recorded by Moses demonstrating that the Creator's calendar of Scripture and the modern Roman Gregorian calendar are not one and the same. Exodus 12, 16 and 19 reveal that the 15th of the month was a seventh-day Sabbath for three consecutive months, a task the Gregorian calendar cannot produce.

In Part 5 we find that the lesson of the manna was ordained by the Heavenly Father to teach more than how to locate His Sabbath. It teaches that each new day begins at sunrise rather than at sunset. In addition, it illustrates the difference between a day and a full calendar date. All of these time units were illustrated so that so that He could test their faithfulness to Him.
