

# Part 7 of Three Months in a Row Video Series is Out!

---

**T**he WLC team is happy to announce the release of part 6 of this most important Three Months in a Row 7-parts  video series. For three months in a row powerful evidence was recorded by Moses demonstrating that the Creator's calendar of Scripture and the modern Roman Gregorian calendar are not one and the same. Exodus 12, 16 and 19 reveal that the 15th of the month was a seventh-day Sabbath for three consecutive months, a task the Gregorian calendar cannot produce.

In part 6 we find that in the third month after the Exodus, Israel arrived at Mt. Sinai "on the very day" they had left Egypt. Was this the providence of Yahuwah or simply coincidence? Watch the video to find the answer!.
