1. Turn the worksurface over onto a clean, soft surface like carpet.

2a. Use pilot holes to locate and install the Leg Trim Assembly with the screws provided.

2b. Snap leg bracket covers onto leg brackets, between leg and worksurface.

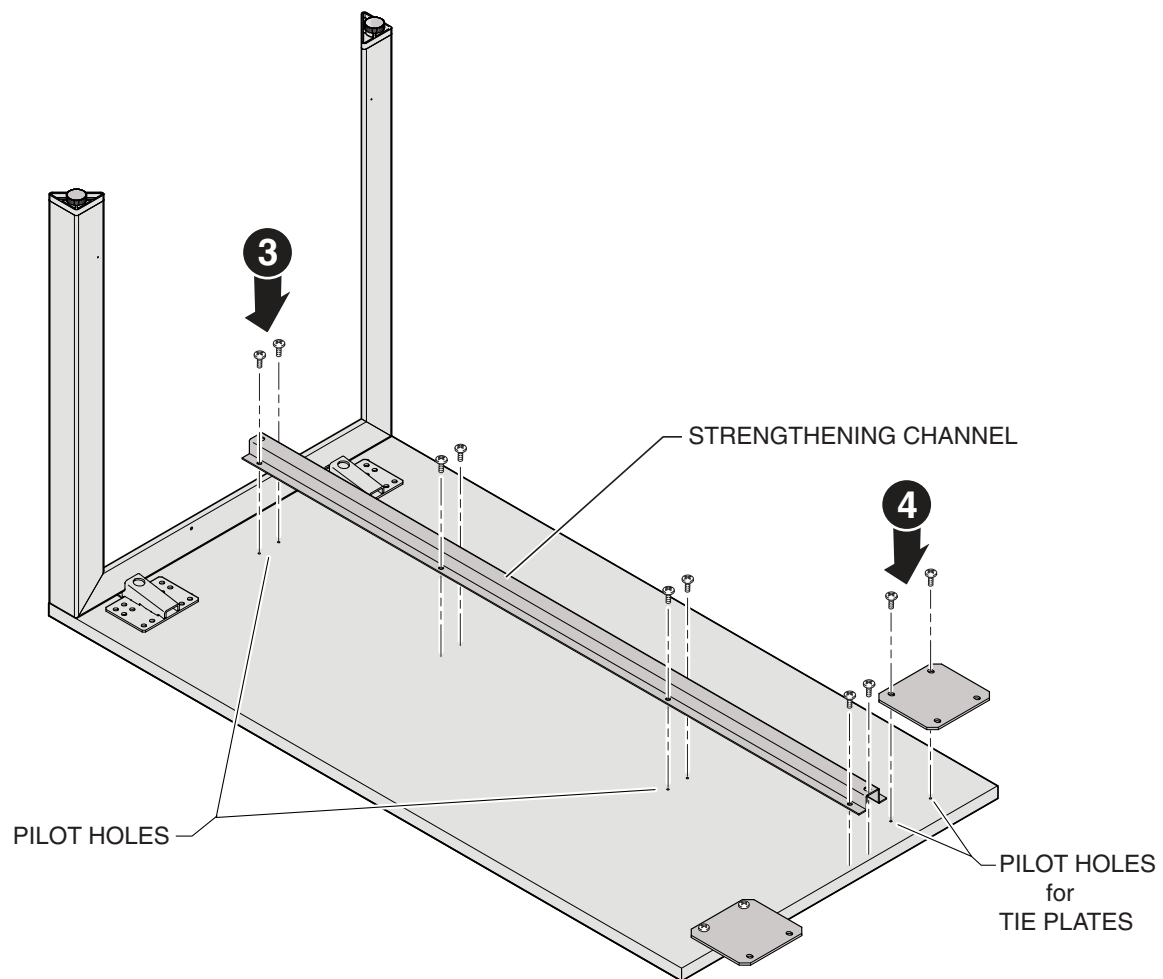

1 *TIP: Use a shim to elevate one edge of the worksurface. This will allow a finger hold when assembly is ready to turn upright.*

3. Use pilot holes to locate and install the Strengthening Channel.

NOTE: 36" wide units will use (2) of the Strengthening Channels.

4. Use pilot holes to locate and install the (2) Tie Plates with the screws provided.

5. Position the return at desired location with the bench, then align the worksurface edges flush.

6. Secure the return with the screws provided (no pilot holes are provided on the underside of the the bench worksurface).

7. Adjust leveling glides as needed.
