

Training Program

Minimize the impact of turnover, enhance competency and retain employees longer with training programs customized to your equipment, facility, personnel and goals.

Training programs delivered by seasoned CMD service technicians are offered in a combination of classroom and hands-on instruction and practice. Programs can be scaled from the basics for the beginner to advanced training for your technicians working with new assets and technologies.

- ✓ The training your personnel need to operate, troubleshoot and maintain your equipment
- ✓ Focused for equipment maintenance personnel or operators
 - Types of training can be combined depending on your audience
- ✓ Demonstrations and hands-on practice and guidance
- ✓ Classroom instruction with handouts for study or future reference
- ✓ All instruction is based on the provided owner's manuals
- ✓ Training provided in your facilities or at CMD
- ✓ Standard course length is Tuesday through Thursday but will depend on how many types of machines and modules requested for training

We also offer a Train the Trainer course, where our instructor delivers training to your selected personnel, so they can mentor all the personnel in your facilities.

Call 1-800-626-0210 to schedule training for your personnel or for more information.
