FOR IMMEDIATE RELEASE

## New listings rise to start the New Year

**VANCOUVER, B.C. -- February 4, 2008** – The Real Estate Board of Greater Vancouver (REBGV) reports that residential attached, detached and apartment property sales totalled 1,819 in January 2008, an increase of 0.7 per cent over the 1,806 total residential sales in January 2007 and a 5.5 per cent decline from the 1,924 sales recorded in January 2006.

New listings for detached, attached and apartment properties climbed 14.9 per cent in January 2008, compared to the 4,067 units listed in January 2007. In contrast to January 2006, new listings from this January rose more dramatically, up 34.7 per cent.

“With new listings outpacing sales increases to start the year, it appears the market is heading toward more balance,” says REBGV president Brian Naphtali. “The result will be welcome for consumers looking for more time to undertake due diligence before making a buying or selling decision.”

Sales of apartment properties in January 2008 rose 11.7 per cent to 860, compared to 695 sales in January 2007. The benchmark price, as calculated by the MLSLink Housing Price Index®, of an apartment property increased 13.8 per cent from January 2007 to \$378,336.

“It was clearly on the strength of apartment sales that overall residential sales figures increased in January,” says Naphtali. “There’s clearly been a trend over the past decade toward growth in the high density condo market. Townhome sales have continued to be steady, and detached homes remain a popular choice. But more and more consumers are purchasing apartments.”

Attached property sales in January 2008 declined 6.7 per cent to 318, compared with the 341 sales from January 2007. The benchmark price of an attached unit increased 12.4 per cent from January 2007 to \$462,627.

January 2008 sales for detached properties decreased 7.8 per cent to 641, from the 695 detached units sold over the same period in 2007. The January benchmark price for detached properties rose 15.7 per cent from January 2007 to \$742,490.

### HOW TO READ THE TABLE:

**BENCHMARK PRICE:** Estimated sale price of a benchmark property. Benchmarks represent a typical property within each market.

**PRICE RANGE:** Expressed as a + or - percentage of the benchmark price, there is a 90% probability the sale price of a benchmark house is within the interval.

**PRICE INDEX:** Index numbers estimate the percentage change in price on typical and constant quality properties over time. All figures are based on past sales.

In Year 2001, the indexes are averaged to 100
