**TOO LOUD?
TOO BAD!**

No cutting, drilling or other modifications to the vehicle are required! Our heavy-duty, USA-made steel brackets allow for installation using basic hand tools. Each kit includes a waterproof 150 PSI compressor, a USA-made steel air tank, a kickass set of Klein train horns and all the hardware, air fittings and wiring needed for a complete, professional-grade installation.

See reverse for specifications.

FORD F-150 & RAPTOR

DIRECT FIT SYSTEMS

Kleinn Air Horns Vehicle Specific Onboard Air and Train Horn Systems are a direct fit for the Ford F-150 and Raptor trucks.

Like all Kleinn vehicle specific systems, the kit is a 100% bolt-on installation. System includes a fully submersible waterproof air compressor, a Kleinn exclusive design. The model specific mounting brackets make it easy to install the kit with common hand tools for a factory add-on appearance.

The horn kits include either the Demon™ model 730 steel triple train horn or the Beast™ model 230 high impact ABS triple train horn. These horns produce a thundering 157.8 and 153.3 decibels respectively. The 100% duty cycle compressor is capable of inflating 37" tires, powering small air tools and air bags. Included with the kit is a quick-connect tire inflator with storage bag and all the necessary hardware and fittings for a professional looking installation. Ford OBA onboard air systems include a digital inflator gun and a 160 PSI panel mount pressure gauge.

- No Drilling or Modifications Required – 100% Bolt-On Installation
- 150 PSI Onboard Air System with Waterproof Air Compressor
- 100% Duty Cycle Compressor Easily Inflates 37" Tires
- Custom Designed Bolt-On Powder Coated Mounting Brackets, Made in USA
- Powder Coated Steel Air Tank, Made in USA
- Available With Train Horns or as an Onboard Air System Only
- Quick-Connect Tire Inflator With Storage Bag Included
- Complete With Hardware, Air Line, Wiring and Detailed Instructions
