TOO LOUD?
TOO BAD!

SHOWN WITH OPTIONAL SECOND COMPRESSOR (P/N JK6450)

No cutting, drilling or other modifications to the vehicle are required! Our heavy-duty, USA-made steel brackets allow for installation using basic hand tools. Each onboard air system includes a water-proof 150 PSI compressor, a USA-made steel air tank and all the hardware, air fittings and wiring needed for a complete, professional-grade installation. Also available is a kick-ass set of Klein's train horns as an add-on option. **See reverse for specifications.**

JEEP WRANGLER JL AND JK

JL-JK-OBA ONBOARD AIR SYSTEM

The Jeep Wrangler JL-JK-OBA onboard air system is a heavy-duty high-volume air supply mounted between the frame rails and protected by a steel cage and skid plate. The system includes the only fully submersible WATERPROOF 12-volt air compressor for automotive use. The 2.0 CFM compressor and 2.8-gallon tank can power air horns, air lockers, air tools, and quickly inflate 37" tires. Kit includes a quick connect digital tire inflator and 160 PSI panel mount gauge.

A second add-on compressor is available to allow you to air up two 37" tires at once.

Add-on train horn kits are available for both the JL and JK 2- and 4-door models. (Air system required).

JEEPKIT1 AND JEEPKIT99 COMPACT AIR HORN KITS

The JEEPKIT systems are compact direct fit dual air horns. Great for sounding a warning when cresting a dune or rounding a bend. Fits JK and JKU 2- and 4-door models.

- 100% Bolt-On for a Professional Looking Installation
- 6260RC 120 PSI Sealed Air Compressor
- All Metal Dual Air Horns Produces 152 dB at 120 PSI
- Kleinn Direct Fit Powder Coated Mounting Brackets, Made in the USA
- 0.66-Gallon Air Tank
- Capable of powering aftermarket air lockers
- Complete with Hardware, Air Line, Wiring and Detailed Instructions
