WATERSHED
Assignment 10 • Weather 2

Read:
Manual – Weather

Vocabulary:
Define the following on a separate piece of paper – weather, climate, convection, condensation.

Work:
• Research the history and tracking of Hurricanes. Write a 1 page paper that explains, scientifically, how Hurricanes (tropical cyclones) develop, what the different stages and categories are (with examples and pictures) and what humans have put into place to predict this weather phenomenon.

• Create a power-point demonstration to explain the rainbow phenomenon.

Project:
Create a demonstration that explains all the steps in the creation of lightening. Explain the exact science. Make some lightening!!!!!
