

# Managed Services Product Compliance

Safety Data Sheet Authoring and Regulatory Consulting

ACHIEVE YOUR BUSINESS GOALS AND OPTIMIZE PROCESSES WITH  
SPHERA COMPLIANCE & REGULATORY EXPERTISE

## BENEFITS

- Respond to complex or extensive regulatory compliance requirements
- Improve your ROI by increasing flexibility in your internal EHS capabilities
- Gain access to seasoned regulatory experts that have developed best practices
- Support business growth into new markets or product lines
- Reduce compliance burden for national and international legislations

In today's market, organizations struggle to hire, develop and retain the regulatory experts who can manage and provide comprehensive coverage for complex product stewardship and regulatory compliance issues. Even with full-fledged in-house EHS teams on hand, competing business priorities can limit the ability of your resources to provide complete coverage for your needs. Many scenarios can contribute to a sudden spike in need for regulatory expertise such as:

- Expansion into new markets
- Acquisition of new businesses
- Launch of new product lines
- Large scale regulatory changes

### Our team of experts can help you

Our team of product compliance experts, supported by our market leading software and regulatory content, can complement your product stewardship efforts. We can help you eliminate risks due to the lack of availability or scarce in-house experts, especially during critical times.

By continuously monitoring current and proposed changes and implementations around the world, we can help you plan and safely ride regulatory transition periods. Our team of regulatory experts have a long track record of experience and success with over 150 different customers. Our expert team can produce your safety documents, provide you with consultation services, or complement your current resources as needed, either on a short term or long term basis, enabling your staff to focus on your EH&S activities and core competencies.

### Our People

Our team is composed of highly qualified Project Managers with substantial experience in industrial EHS as well as regulatory affairs. Our Project Managers and all Authors have science or engineering degrees, generally in chemistry or biological sciences. The majority of our team
