WHY MODERNIZE YOUR DATA CENTER
With Cisco and KeyInfo

Data Center Trends

Today's data center requirements are much different than even just a few years ago.

x3
Global data center IP traffic will nearly **triple** over the next 5 years[1]

Faster CPU I/O is driving 10 Gigabit Ethernet as the default server connectivity

78%
78% of IT leaders say the data center network is more critical to delivering apps than just a year ago[2]

Support Today's (and Tomorrow's) Data Center Requirements with Cisco Nexus

The new generation of Cisco data center solutions, featuring Cisco Nexus® switches, are designed specifically to reduce IT costs, simplify management and operations, and increase the ability to support new business demands in the future.

Optimized for Any Data Center Function:
Whether you're moving towards data center virtualization, disaster recovery, consolidation, or cloud-based initiatives, Cisco Nexus provides a future-proof switching infrastructure.

Industry-leading Convergence:
You'll manage less devices, reduce cabling requirements, and lower cooling costs – simplifying architecture and decreasing cost of ownership.

Stay ahead of IT Trends:
As the world moves towards software-defined networking, Nexus switches enable the movement towards Cisco's Application Centric Infrastructure

Scalability with Simplicity:
Scale your data center network to support more servers and applications whenever you need them, with single pane of glass management

40/100 Gigabit Ethernet:
Cisco Nexus will futureproof your data center infrastructure as it can scale from 10 to 40/100 Gigabit Ethernet, and help you with connectivity.

Customers who have migrated to Nexus switches are seeing impactful outcomes:

75%
Up to 75% savings in infrastructure costs

80%
Up to 80% faster deployment times

60%
Up to 60% savings in power and cooling costs

KeyInfo is Your Data Center Expert

As you search for a partner to help your organization transition to a modern data center, it is important to look for just that – a partner.

Cisco Premier Partner with decades of experience

Holistic approach to addressing your data center needs

Qualified to perform overall IT environment assessments

Consultative approach to diagnose real IT issues

Full service IT – Co-location, cabling, or X-as-a-Service with our Data Center services

Get a Free Network Switching Assessment

Call us at **(877) 442-3249** or click the button below to sign up for one of our **FREE** Network Switching Assessments. We can help you evaluate your current IT environment, and work with you determine what your data center needs to look like for the future.
