

# KEYCLOUD: ENTERPRISE CLASS INFRASTRUCTURE-AS-A-SERVICE, POWERED BY HPE HELION

KeyCloud is a managed, highly scalable, SAN-backed cloud built on HPE Helion OpenStack. KeyCloud can extend your on premise IT into the cloud with high performance and robust security based on proven HPE hardware, all managed by our team of experienced IT professionals. We can guarantee performance in ways that a typical cloud cannot, and we make sure that you have the resources you need without the hassle of managing everything yourself.

## KEYCLOUD COMBINES HPE STORAGE AND COMPUTE WITH CARRIER-GRADE CONNECTIVITY TO PROVIDE ROBUST, SCALABLE, AND SECURE INFRASTRUCTURE

### BUILT ON HPE HELION OPENSTACK

Provides a unified front, as well as an enterprise-grade foundation for all KeyCloud services

- Only provider in Southern CA who offers Helion on OpenStack
- Combines open source flexibility with HPE reliability
- Easily integrate other KeyCloud services like DR disaster recovery, backup and recovery, and monitoring

### HPE APOLLO 2000 SERVER FOUNDATION

Provides high-density performance, efficiency, and massive scalability to handle any of your workload needs

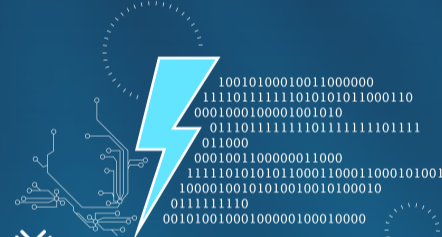

- 2X the density of standard servers
- Water-cooling dramatically increases efficiency
- Provides customized performance that is optimized to your workloads

### CARRIER-GRADE KEYINFO FIBER

Provides a highly reliable, secure private network with 3,000 miles of nearly unlimited fiber capacity

- Creates ideal security for sensitive information
- Flexible and scalable as your infrastructure needs grow
- Supports mission critical, high-capacity business applications

### 3PAR FLASH STORAGE OPTIMIZED

Provides greater performance, scalability, simplicity, and adaptability than traditional HDDs

- Creates 99.999% data availability
- Encrypted for optimal security
- Multi-tiered RAID configurations for lightning quick performance

## WHY RELY ON KEYCLOUD?

We'll work with you to create an Infrastructure-as-a-Service solution to meet your specific workload needs.

Seamless integration with your on premise IT

HIPPA, and SSAE SOC compliance

Support for unique workloads, including VMware

We operate all of our data centers
