

EVA SANE

Sexual assault examinations simplified

A secure and easy-to-use forensic documentation system for fast examinations

Use the **EVA SANE** to:

Visualize and capture

Record high-quality full body and external cavity images and video on an FDA-cleared device with up to 16x optical magnification

Annotate and document

Utilize digital image filters to show redness or find bruising on the body, annotation tools, and case notes for accurate documentation

Analyze and report

Generate demographic data for fast and simple reporting to administrators and funders

Share cases securely

Export patient data to multiple formats and safely share cases with medical professionals and relevant authorities

The equipment that we used in the past just felt very bulky and it was very intrusive for the patient. With the EVA System, it is handheld, we are right there... and it is easy to use.

EVA System®

EVA FOR SEXUAL ASSAULT EXAMINATIONS

The portable, reliable, and affordable EVA SANE enables the clinical team to focus on the patient while easily capturing any forensic findings

Use the EVA System to:

 **Achieve high-quality images and video**
Utilize glare-reducing optics for clear images and accurate visual assessment

 **Speed up your workflow**
Manage a full workflow at the point-of-care with digital image filters, annotations, and case notes to aid forensic data-recording

 **Ensure reliable chain-of-custody tracking**
Track information collected from the point-of-capture, including original and digitally enhanced images, to ensure legally-sound chain-of-custody

 **Focus on the patient, not the equipment**
EVA's easy-to-use software, small size, and unobtrusive design ensures a swift and sensitive evidence collection process for patients and medical staff

 **Enhanced privacy and security**
EVA allows you to securely store and manage patient information, photos, videos, notes, and case files on our HIPAA-compliant online server

I highly recommend this product to all forensic nursing programs.
