

# CHART FASTER, SAVE TIME, AND DO MORE WITH NEXTGEN<sup>®</sup> MOBILE SOLUTIONS

Mobile technology increases provider satisfaction and productivity

## Increase efficiency and raise morale—you may find revenue going up as well

12

hours can be saved, on average, per month per physician by using mobile technology to document and streamline workflows<sup>1</sup>

90%

of work is completed between 9 a.m. and 6 p.m., Monday through Friday<sup>2</sup>

MORE

patients can be seen by physicians by accelerating charting and minimizing unnecessary screen time

## Going mobile—gain more time and help your practice thrive

Ongoing documentation demands, such as coding and quality tracking, as well as new requirements under emerging payment models, often interfere with efficiencies for practices. Rather than helping ease the documentation burden, electronic charting requirements can complicate workflows. The result? Less time for direct patient care and greater risk for physician burnout.

**NextGen Mobile Solutions (formerly Entrada)** use mobile technology that enables you to more simply and conveniently meet documentation requirements. These efficiencies give your physicians time back, so they can spend more of it seeing patients. Going mobile with support from NextGen Healthcare helps your staff work smarter and reduce burnout, empowering your practice to thrive.

## Documentation where you want, when you want, how you want

NextGen Mobile Solutions leverage integrated, vendor-agnostic mobile technology that aligns with your EHR system. Use a mobile phone to document patient visits according to your preferences—through front-end speech recognition, back-end transcription, a remote scribe, or even a combination of these workflow options.

“With the sheer volume of patients I see, I’m not sure how I would get through my day without NextGen Mobile Solutions. Remarkable.”

- An orthopedic surgeon in Nashville, Tennessee

## Quick and easy data capture, documentation, and sharing

Complete key EHR tasks from a mobile device. Using an Android or iOS phone, you can:

- View and share clinical content in an instant, including allergies, current medications, lab results, and past surgical histories
- View the clinical schedule
- View images and documents from the EHR
- Capture images
- Capture diagnosis codes, powered by IMO® Problem IT Terminology
- Text securely with colleagues

## Better quality across the continuum

Accurate, complete documentation and timely communication are essential to ensuring quality across the continuum of care. With NextGen Mobile Solutions, care teams can collaborate via a secure texting platform in an instant, while potentially avoiding critical errors from lapses in documentation and clinical miscommunication.

“I’m seeing more patients and leaving the office on time again. NextGen Mobile Solutions has truly been a life-changing event.”

- A family physician in Anchorage, Alaska
