

My mother-in-law Mrs. Lianfang Zhao passed away this Sunday morning, May the 6th 2012. On behalf of my family, I am writing this testimonial to thank Dr. Tian for his excellent medical care to her at the late stage of the **lung cancer**.

She was found a lung mass at 6/22/2011 by CT at Fairfax Radiology. The chest CT demonstrated a pulmonary mass-like in the left upper lobe, approximately **5.8x3.6cm**. She is a lifelong nonsmoker, but a 30 years long 2nd hand smoker. She had **severe cough with blood** at that time. We were told by her oncologist that she may have just **3 to 6 months to live**. Since she was almost 80 years old, we decided not to receive the chemotherapy, given the fact that so many lung cancer patients were tortured by chemotherapy while their lifespan were not significantly increased. Therefore we started to look for an expert for fight against cancer with traditional Chinese medicine. With a referral of my friend, we found Dr. Tian.

During the initial visit with Dr. Tian at July of 2011, he told us that his treatment would **stabilize the tumor, increase lifespan with very good quality of life**. Usually most of his patients may have no suffering except the last few days of their lives. We should treat her as if she just has some common aging problem rather than a malignant disease. That's the goal we actually wanted to achieve. **Her cough with blood was quickly under the control of Dr. Tian's special herbal formula**. She just continued with his Chinese herbal formula with a few acupuncture treatments since she had almost no cancer-related symptom, except slight edema around ankle.

In 11/29/2011, **4 months after Dr. Tian's treatment**, she had another CT done at Fairfax Radiology again. The image result shows that **her mass in the lung has almost no change**. Her oncologist was surprised with this result and said that "I don't know what Dr. Tian did, just keep receiving his treatment." Around 1.5 months ago, she run out the herbs and it's not convenient for us to bring her to Dr. Tian's office. We requested a shipping of herbs from Dr. Tian, but the package was unexpectedly delayed 5 days by post office. Due to the absence of Dr. Tian's herbs, she had cough with blood again and her symptom was under control again when she resumed the herbs. It was not done like an experiment, but nevertheless this seems to have been a good demonstration that the Dr. Tian's herbs are certainly playing very important role on her condition.

With Dr. Tian's unique medication and sound professional advice, she had not experienced much pain as most of advanced cancer patients do and lived with quality and dignity for **more than 10 months**. She had only a fever in her last day and passed away in a very peaceful manner. **Dr. Tian's treatment certainly proved what he claimed in the initial visit, i.e. a stabilized tumor and a prolonged life span with few suffering**. My family and I really appreciated his service and definitely recommend him to my friends as one of our favorite doctor.

Peter Zhao (May 7, 2012)
