

Status Updated on September 29, 2012

I was diagnosed as **primary liver cancer** at May of 2011. My **AFP**, the marker for liver cancer, was as high as **3361.0** ng/mL. To my own knowledge, western medicine has nothing to offer on my condition. My relatives and friends who had same condition to mine all died very quickly after receiving conventional therapies such surgery, radiation therapy and chemotherapy. Therefore, I made my mind that I should not receive any western medicine and I should see traditional Chinese medicine oncologist. I was referred to Dr. Tian by a friend of mine, who had colon cancer and was cured by him. I started taking Dr. Tian's Liver Cancer Formula from September 10, 2011. I had my AFP tested again at October 27, 2011 and it went down to **12.8** ng/mL! It took **only 47 days** for Luke Liver Formula to bring his AFP from 3361.0 ng/mL down to 12.8 ng/mL. At Nov 1, 2011, the CT scan of my liver shows a **slight decrease in the size of an hepatic mass** from 4.6 x 3.6 cm (scanned at 5/27/11) to 2.5 x 4.6 cm. I had my AFP tested again at March 9, 2012 and it went down further to **1.6** ng/mL, suggesting a very good trend. Now I have been on this formula for almost **9 months**. In the past 9 months, I have not received any conventional treatment from my doctor, except Chinese herbal medicine from Dr. Tian. Now I am free of any cancer-related symptom. He has good energy and appetite, no pain in liver region, no ascites, no metastasis. I have been in great shape and does fishing every day. I am so glad to share my good results and experience with everyone.

Date Collected	Alpha-Fetoprotein (AFP, ng/mL)
05/20/2011	3361.0
10/27/2011	12.8
03/09/2012	1.6
06/27/2012	1.4
08/14/2012	1.3

August 14, 2012, I had my blood work done again and my AFP went down further to **1.3** ng/mL. It has been **12 months** since I started Dr. Tian's herbal formula for liver cancer. I feel great.
