

Be clear on the facts.

Your 'must-ask' checklist.

Know the facts.

- What teeth straightening options can help me achieve the outcomes I am looking for?
- Why is an in-person examination with a registered specialist orthodontist or dentist recommended before beginning treatment?

Know what to ask.

- What are the potential risks associated with the treatment option I am being recommended?
- Who will be responsible for applying or fitting the product and who will manage my care throughout treatment?
- Who do I contact if I am experiencing excessive pain or discomfort or my aligner doesn't seem to fit properly?
- Will I be able to schedule an in-person appointment with my treating orthodontist or dentist if I want one?

Know what you are getting.

- What product am I being recommended and why?
- Has the orthodontic product I am being recommended had any product recalls or alerts issued by a regulator?
- Where can I find out more information about the product I am being recommended?

If it doesn't say Invisalign, it's not.

Don't be afraid to ask what product you are being recommended and why, and where you can access further information.

Find out more.
