Area Sensor

Picking sensor

■Features

- •Plastic injection case
- •Slim body (W30×H10.5×140mm)
- ●Wide range of sensing distance(0.1~3m, 0.05~1m)
- •Mutual interference prevention (FREQ A/B)
- •Light ON/Dark ON switching mode
- •Picking indicator includes
- •IP40 rated waterproof structure (IEC standard)

■ Specifications

Model NPN open collector output PNP open collector output		n collector output	BWPK-25-05		
		n collector output	BWPK-25-05P		
Sensing type			Transmitted beam type		
Sensing Long mode distance Short mode		Long mode	0.1 ~ 3m		
		Short mode	0.05 ~ 1m		
Sen	sing targe	t	Opaque materials of min. ϕ 35mm		
Opt	ical axis pi	tch	25mm		
Nur	nber of op	tical axis	5pcs		
Sen	sing width		100mm		
Pov	ver supply		12-24VDC ±10% (Ripple P-P:Max. 10%)		
Pro	tection circ	uit	Includes		
Cur	rent consu	mption	Emitter: Max. 50mA, Receiver: Max. 50mA		
Control output		:	• NPN open collector output Load voltage:Max. 30VDC, Load current:Max. 150mA, Residual voltage:Max. 1V • PNP open collector output Load current:Max. 150mA, Output voltage:Min.(Power supply-2.5)V		
Оре	eration mod	de	Switching of Light ON/Dark ON		
Res	ponse time	e	Max. 30ms		
Ligh	nt source		Infrared LED (850nm modulated)		
Inte	rference p	rotection	Interference protection by master/slave function		
Pro	tection circ	uit	Reverse power polarity, Output short-circuit(Overcurrent) protection		
External picking input		ng input	Non-contact or contact input NPN open collector output: Lighting(0-2V), Light out(5-30V or open) PNP open collector output: Lighting(4-30V), Light out(0-3V or open)		
	Ambient temperature		-10 ~ +55 °C (at non-freezing status)		
Environment	Storage t	emperature	-20 ~ +60 ℃ (at non-freezing status)		
onn	Ambient I	numidity	35 ~ 85%RH		
nvir	Storage h	umidity	35 ~ 85%RH		
Ambient illumination		llumination	Sunlight: Max. 11,000/x, Incandescent lamp: Max. 3,000/x		
Noise strength		1	The square wave noise by the noise simulator (Voltage: ±240V, Period:10ms, Pulse width:1μs)		
Dielectric strength		ngth	1,000VAC 50/60Hz for 1minute		
Insulation resistance		stance	Min. 20MΩ (500VDC mega)		
Vibration			1.5mm amplitude at frequency of 10 ~ 55Hz in each of X, Y, Z directions for 2 hours		
Sho	ck		500m/s ² (50G) in X, Y, Z directions for 3 times		
Protection			IP40(IEC standard)		
Material			• Body : PC/ABS, Lens : Acrylic		
Unit weight			Approx. 250g

■ Feature data

■Input/Output circuit and connection diagram

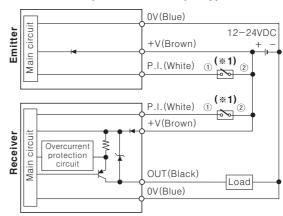

<NPN open collector output type>

(*1) Picking input(P.I) : Contact or transistor are ON. Picking indicator us operated.

<PNP open collector output type>

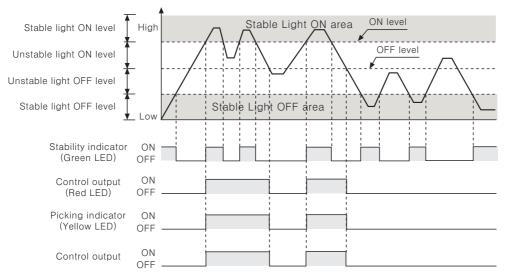

(***1**) Picking input(P.I) : Contact or transistor are ON.
Picking indicator us operated.

*Picking indicator: When external picking input (P.I) is short-circuited with OUT (Black), it is operated same as ON/OFF status of control output.

■Timing diagram of operation

- ₩1. Picking indicator is operated connecting output to picking input, or it will be OFF regardless of operation mode.
- 2. The above diagram is for Light ON mode, it is operated reversely in Dark ON.

■ Structure

Operation mode switch

No		Function	Switch OFF	Switch ON	
1	Trans	mission frequency selection	Frequency A	Frequency B	
2	Operation indicator selection		Operation indicator selection Lighting indicator F		Flickering indicator
(3)	Emitter Sensing distance mode selection		Long mode	Short mode	
(3)	Receiver Operation mpde selection		Light ON mode	Dark ON mode	

Functions

Switching function of Long / Short mode (Selectable sensing distance)

The rated sensing distance is 3m for Long mode, 1m for short mode. It minimizes interference setting as short mode when using more than 3 sets closely together.

	Operation mode switch(Emitter)	Rated sensing distance
Long mode	4	3m
Short mode	Short 3	1m

Interference protection function

In case of using 2 pcs of sensor in serial or parallel in order to extend sensing width, the detection can be failed because of their light interference.

This function is to avoid the light interference as operating a sensor in transmission frequency A and another sensor in transmission frequency B to protect these kinds of failures.

	Operation mode switch(Emitter +Receiver)	Frequency A, B indicator(Emitter)
Sensor (A) (Transmission frequency A)	4 3 5 FREQ.A	Frequency A(Green) Frequency B(Green)
Sensor (B) (Transmission frequency B)	4 3 2 FREQ.B 1	Frequency A(Green)

OSwitching Light-ON / Dark-ON

In Light-ON mode, the control output is ON when the target is missing. In Dark-ON mode, the control output is ON when the target is present.

	Operation mode switch(Receiver)	Control output operation
Light ON	4 3 2 1	It is ON when it is lighted.
Dark ON	Dark ON 3	It is ON when it is shaded.

Switching Steady / Flashing Light of Picking indicator

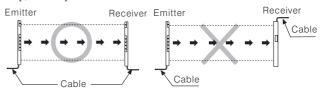

Select the indication method of operating indicator LED to make out work sensing operation more easily.

	Operation mode switch (Emitter+Receiver)	Picking indicator operation
GLOW	4 3 2 1 GLOW	Lighting indicator
BLINK	4 3 BLINK 2 1	Flashing indicator

Installation

©For direction of installation

Emitter and receiver should be installed in same up/down position.

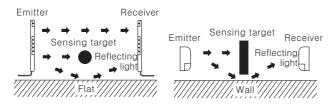

©Reflective Surface Interference

In the case shown below, the beam can be reflected from the wall or flat surface and exposed to the receiver. Please pre-test the operation of sensor with a target under this condition.

(Interval distance: Min. 0.3m)

K-81 Autonics

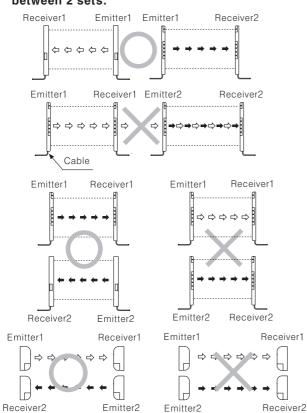

Area Sensor

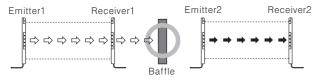

OFor prevention of interference

It may cause interference when installing more than 2 sets of the sensor. In order to avoid the interference of the sensor, please install as following figures and use the interference prevention function not to let light of the other emitter in a receiver..

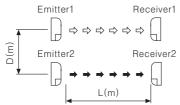

Transmission direction should be opposite between 2 sets.

•Baffle should be installed between 2 sets.

Keep sufficient distance between two sets of sensors to avoid mutual interference.

Sensing distance(L)	Allowable installation of distance(D)		
0.1~1m	Min. 0.1m		
Min. 1m	Min. 0.2m		

^{*}There will be small difference depending on installing environment.

■Operation indicator

	Emitter		Receiver			
Item	Indicator		Indicator			Control
110111	Green	Picking indicator	Green	Red	Picking indicator	output
Power supply	Þ	•	_	_	_	
FREQ. A operation	≎	•	_	_	_	_
FREQ. B operation	Ф	♦	_	_	_	
Stable light ON level	_	≎	≎	≎	✡	ON
Flashing function ON		•	≎	✡	•	ON
Unstable light ON level	_	≎	•	≎	≎	ON
Unstable light OFF level	_	•	•	•	•	OFF
Stable light OFF level	_	•	≎	•	•	OFF
Overcurrent	_		•	•	•	OFF

Display classification list				
Light on				
Light off				
Flashing by 0.3 sec.				
•	Flashing simultaneously by 0.3 sec.			

- **Picking Indicator operates when output is connected to picking input. (When it is not connected, picking indicator is OFF regardless of operation modes.)
- **Red indicator, Picking indicator, Control output are for Light ON mode in Stable light ON, Unstable light ON, Unstable light OFF and Stable light OFF. For Dark ON mode, they operate in opposite. (When malfunction of synchronous line or overcurrent occurs, control output is OFF in both modes.)

■Inspection/Solution for malfunction

Malfunction	Caution	Solution		
	Power supply	Supply rated power		
Non-operation	Cable disconnection, incorrect connection	Check the wiring		
	Rated connection failure	Use within rated sensing distance		
Irregular operation	Contamination by dirt on sensor cover	Remove dirt by soft brush or cloth		
illegulai operation	Connector connection failure	Check the assembled part of the connector		
	Out of rated sensing distance	Use within rated sensing distance		
Control output is OFF even though there is not a	There is an obstacle that cut off the light between emitter and receiver	Remove the obstacle		
target object.	There is a strong electric wave or noise generated by motor, electric generator, high voltage line etc.)	Put away the strong electric wave or noise generator.		
LED display for	Shorted control output line	Check the wiring		
overcurrent	Over load	Check the rated load capacity
