4.1.1 The minimum site area for a one-family dwelling or one-family dwelling with secondary suite is 334 m², and the minimum site width for a one-family dwelling or one-family dwelling with secondary suite is 7.3 m.

4.1.2 Where the site is less than 9.8 m in width or less than 334 m² in area, the design of any new dwelling shall first require the approval of the Director of Planning or the Development Permit Board, as the case may be.

4.1.3 The minimum site area for a dwelling unit for a caretaker shall be 3 000 m².

4.2 Frontage -- Not Applicable.

4.3 Height

4.3.1 A building shall not exceed 9.5 m in height and shall not have more than 2½ storeys nor exceed the maximum dimensions created by the combination of:

- (a) a primary envelope located in compliance with the side yard regulation and formed by planes vertically extended 4.9 m in height and then extending inward and upward at an angle of 30 degrees from the horizontal to the point where the planes intersect; and
- (b) a secondary envelope located between the required side yards and equal to 60 percent of the site width (except as provided for by section 4.3.2) and formed by planes vertically extended 7.6 m in height and then extending inward and upward at an angle of 45 degrees from the horizontal to the point where the planes intersect.

4.3.2 The secondary envelope need not be less than 9.8 m in width except as limited by the required side yard.

4.3.3 Height shall be measured from a hypothetical surface determined by joining the existing grades at the intersections of the hypothetical lines defining the front and rear yards and the side property lines, except that if the Director of Planning is of the opinion that the hypothetical surface determined by joining the existing grades is not compatible with the existing grades of adjoining sites or general topography of the area, he may instead require that height be measured from base surface.

4.3.4 Notwithstanding the height limitation in section 4.3.1, the Director of Planning may permit a building to exceed a height of 9.5 m but not to exceed a height of 10.7 m provided that he considers:

- (a) the impact of the increased height on views from surrounding development;
- (b) the extent to which the increased height improves the roof lines of the building; and
- (c) the effect of the increased height on adjacent properties and the character of the area.

4.3.5 Where the Director of Planning is prepared to approve an increase in floor space ratio pursuant to section 4.7.1(c), he may permit a building to exceed any of the maximum dimensions of section 4.3.1 provided that in no case shall the height be increased to more than 10.7 m.

4.3.6 Notwithstanding section 4.3.1 of this schedule, the Director of Planning may permit a height increase to accommodate building features designed to reduce energy consumption in a Certified Passive House to a maximum of 10.7 m, if the Director of Planning first considers the intent of this schedule and all applicable Council policies and guidelines.

4.4 Front Yard

4.4.1 A front yard with a minimum depth of 20 percent of the depth of the site shall be provided, except that:

- (a) on a site where the average front yard depth of the two adjacent sites on each side of the site is more than the 20 percent depth by at least 1.5 m or is less than the 20 percent depth, the minimum depth of the front yard to be provided shall be that average, subject to the following:
 - (i) where an adjacent site is vacant, it shall be deemed to have a front yard depth of 20 percent of the depth of the site;
 - (ii) if one or more of the adjacent sites front on a street other than that of the development site or the adjacent sites are separated by a street or lane, then such adjacent sites shall not be used in computing the average;
 - (iii) where the site is adjacent to a flanking street or lane, the average depth shall be computed using the remainder of the adjacent sites;
- (b) the Director of Planning may vary the front yard requirement on a double fronting site or a site where a building line has been established pursuant to section 14.1 of this By-law;

- (c) if the provisions of section 4.4.1(a) and section 4.6.1 of this Schedule result in a distance between the front yard and the rear yard which is less than 35 percent of the depth of the site, and provided that the principal building is sited so that it abuts the required rear yard, the depth of the required front yard can be reduced so that the distance between the front yard and the rear yard is equal to 35 percent of the depth of the site; and
- (d) Covered porches complying with the conditions of section 4.7.3(g) shall be permitted to project into the required front yard a maximum of 1.2 m provided that such a projection is limited to 30 percent of the width of the building.

4.4.2 Where the Director of Planning is prepared to approve an increase in floor space ratio pursuant to section 4.7.1(c), he may permit a building having a lesser front yard than required in section 4.4.1.

4.5 Side Yard

4.5.1 A side yard shall be provided on each side of the building with a minimum width of not less than the site width multiplied by the percent of site width given by the following formula, except that this percent shall never be less than 10 percent and need never be more than 20 percent:

$$\% \text{ of site width} = \frac{\text{site width in metres}}{1.219} - 5$$

4.5.2 In the case of a corner site which has located at its rear, with or without the intervention of a lane, a site which fronts on the street flanking the corner site, the exterior side yard shall be regulated by the provisions of section 11.1 of this By-law.

4.5.3 Where the Director of Planning is prepared to approve an increase in floor space ratio pursuant to section 4.7.1(c), he may permit a building having a lesser side yard than required in section 4.5.1.

4.6 Rear Yard

4.6.1 A rear yard with a minimum depth of 45 percent of the depth of the site shall be provided, except that the rear yard to be provided can be reduced to a depth of not less than the greater of the depths of the rear yards of the sites on either side, subject to the following:

- (a) where an abutting site is vacant, it shall be deemed to have a rear yard depth of 45 percent of its site depth;
- (b) where an adjacent site abuts the site by way of its rear property line or is separated by a street or lane, it shall not be used in computing the reduction in the depth of the rear yard to be provided;
- (c) where the site has an exterior side yard, the rear yard to be provided can be reduced to that of the abutting site; and
- (d) any portion of the principal building to be located within that part of the rear yard decreased as provided for in this section 4.6.1 must comply with the provisions of section 2.2.A(a) of this Schedule.

4.6.2 For the purposes of calculating the rear yard to be provided, where the rear property line does not abut a lane or abuts a lane that is only partially dedicated, the rear yard to be provided shall be calculated and measured from the ultimate rear property line.

4.6.3 Where a building line has been established pursuant to the provisions of section 14.2, such building line shall be deemed to be the southerly boundary of any required rear yard on lands described in "Plan A" of Part III of Schedule E to this By-law, notwithstanding any dimension contained herein.

- 4.6.4 For buildings existing prior to April 12, 1988 the depth of the required rear yard can be reduced by up to 3.1 m, provided that the resulting depth of the principal building does not exceed 35 percent of the depth of the site. The floor of a roof garden or sundeck located within that part of the rear yard decreased as provided for in this section shall not be any higher than the floor of the first storey of the principal building.
- 4.6.5 Where the Director of Planning is prepared to approve an increase in floor space ratio pursuant to section 4.7.1(c), he may permit a building having a lesser rear yard than required in section 4.6.1.
- 4.6.6 Notwithstanding section 4.6.1 of this schedule, the Director of Planning may decrease the rear yard requirement to accommodate building features designed to reduce energy consumption in a Certified Passive House to a minimum of 40 percent of the depth of the site, if the Director of Planning first considers the intent of this schedule and all applicable Council policies and guidelines.
