DevOps: AWS – EC2, RDS, S3, SQS; Gitlab – CI/CD; Zabbix, ELK, Slack Bot, Docker, Kubernetes
Database: MSSQL, MySQL, PostgreSQL, MongoDB, Mongoose, Firestore, Entity Framework, Redis
Familiar with: API Integrations, SaaS Architecture, JIRA, Slack, Scrum, Agile, OOP, TDD, Socket, OCR

Professional Experiences

Panya Studios (Bangkok)

2018 – Present

Full Stack Software Engineer

- Responsible for developing and optimizing a real-time interactive media platform with the MEAN stack
- Works with devops, developers, and data scientists to deploy and maintain dockerized apps in kubernetes
- Integrated the ELK stack with our backend ecosystem for logging and monitoring production environments
- Built a microservice with TypeScript, AWS SQS, and PostgreSQL to process large volumes of data at scale

BookKeeping Express (San Francisco)

2016 – 2018

Full Stack Software Engineer / Scrum Master

- Founding Engineer that joined a FinTech company Pre-MVP and helped transform it from service to SaaS
- Internal app – workflow management and automation with C# .NET MVC Entity Framework MSSQL
- Client app – communication, documents, and financial reports with Angular and RESTful Web APIs
- Managed the agile scrum process of sprint planning, daily stand-ups, and shipping features

ST Tutoring Service & Crawling Ninja (San Francisco)

2014 – 2016

Full Stack Software Engineer / Entrepreneur

- Founded two companies: ST Tutoring Service (EdTech) and Crawling Ninja (Data Scraping)
- Built email landing pages for both companies with Ruby on Rails and Mailchimp integration
- Developed custom crawlers to scrape data with Python (Requests, BeautifulSoup4, Pandas, Scrapy)
- Handled Sales, Marketing, Technology, Operations, Customer Support, and Administrative tasks

Education

UC San Diego 2014
BA Sociology w/ Honors High Distinction
