

Demand-Driven Inventory

We have what you need — when you need it.

Summit stocks the names you trust in quantities that make us your hassle-free supplier. Our local inventory levels are based on customer demand, not on complicated financial formulas. That means each service center has the flexibility to provide even hard-to-find items in order to maintain superior customer service requirements.

You will benefit from our strong relationships with leading manufacturers. As one of the largest electrical distributors in the country, we can negotiate great prices and pass savings on to you.

We can also access manufacturers' inventory for stock checks, backorder status, substitute items and technical help – increasing accuracy and response time to serve you better.

Reliable Inventory Levels

Summit leverages advanced forecasting and inventory management tools to ensure the items required are available when and where they are needed. We maintain safety stocks to guard against stock outages so our inventory levels ensure reliable service.

Our system inspects all items five times a day to identify shortages. Any new requirements are presented to our inventory maintenance team in real time. The team not only considers known requirements, but also actively searches for materials that may be below reorder point in the near future.

The depth and breadth of our inventory give you the competitive advantage you need.

Call **(800) 998-7800** today to learn how Summit can meet your need for reliable inventory solutions.
