CARNEY LOGAN BURKE ARCHITECTS

Sun Valley Bronze is proud to collaborate with CLB Architects on the Lift Series.

CLB Architects is an architecture and interior design firm based in the Rocky Mountain West, specializing in the design of residential, commercial, and arts related projects. Since the firm's founding 30 years ago in Jackson, Wyoming, CLB has evolved to now encompass projects across the United States. Each endeavor is guided with the firm's philosophy – inspired by place. The firm has grown to a staff of 50 with studios in Jackson, Wyoming and Bozeman, Montana.

The Lift Series

The Lift Collection was inspired by a need to bridge the gap between rustic and modern sensibilities. The design is distinguished by a slender, curved silhouette that pairs a simple aesthetic with the organic, textural qualities of bronze. The comprehensive collection includes door hardware, cabinet pulls and bath accessories.

De REUS ARCHITECTS**Sun Valley Bronze is proud to collaborate with de Reus Architects on the Kyoto Collection.**

Founded in 2005, de Reus Architects is dedicated to creating luxury homes and destinations across a broad range of climates and geographies. We distill a project to its essence, exploring client aspirations, location, and culture to inspire meaningful and respectful architecture.

Kyoto Collection

Inspired by a trip to the historic capital city of Kyoto, Japan, the Kyoto Series emphasizes the simple elegance and thoughtful material expression cultivated by centuries of Japanese craftsmanship.

VICA DESIGN

Sun Valley Bronze is proud to collaborate with Vica by Annabelle Selldorf on the Vica Collection.

Vica is furnishings, lighting and accessories by Annabelle Selldorf, distilled over three decades of award-winning architecture and interior design. Born and raised in Cologne, Germany, Selldorf founded Selldorf Architects in New York City in 1988 and conceived of furniture from the start, to fulfill specific needs in ways that the market could not match either in character or quality. Defined by a fundamental logic and expertly made. Vica is form, function and elegance, carefully proportioned. Created for the people and places that bring design to life. Today, Vica by Annabelle Selldorf expands a personal legacy.

Vica Collection

Vica's hardware designs are defined by a fundamental logic. A simple gesture transforms an idea into this versatile collection. Selldorf uses materials and finishes for their integrity and beauty. Every piece is geometry made matter. The Vica by Annabelle Selldorf collection holds a room, complimenting any style. The rest is changeable.
