Genymotion Emulator not showing up in Android Studio 2.0 RC1

Updated: 4/19/2016

Issue

Android studio not seeing Genymotion emulators.

![Select Deployment Target](image)

Cause

This issue may be ADB incompatibility with the newest version of the platform SDK.

Resolution

Change ADB settings in Genymotion to use custom Android STK tools
Procedure

1. Open Genymotion and go to Settings. Select the ADB tab. Select the Use custom Android STK tools bubble then Browse.

2. Path to the SDK android tools that were installed on your computer. Default location is: C:\Users\USERNAME\AppData\Local\Android\sdk
3. Launch Genymotion emulator and go back to Android Studio. Reopen the Emulator setup. You should see the Genymotion emulator.
