16 weeks and later	14 weeks and later	Saline Injection*	Salting
22+ weeks	20+ weeks	Hysterotomy	

\*Today it is rare for an abortion provider to use the saline injection method. However, information regarding a saline injection abortion is included here as Centers may have clients who are suffering from post-abortion syndrome, who had a saline injection abortion in the past.

Heartbeat International would like to thank Dr. Anthony Levatino for his review of these charts.
