Transform Shipping Cartons Into Eco-Friendly Packing Materials...

The **Greenwave 432 Cardboard Perforator** has the solution to help transition from single-use plastic and foam packing materials. Using **heavy-duty solid steel blades**, it transforms corrugated shipping cartons into high-quality eco-friendly perforated packing materials. This **freestanding unit** features heavy-duty casters for easy mobility and a **molded plastic waste bin**. Operation is easy: choose the finished size of the packing materials, adjust the cutting guide, press start, and insert cardboard. The result is **flexible, shock-absorbing netting** which is easy to wrap around objects to provide protective cushioning during shipment. It's **essentially producing free packaging material**, and can promote a sustainable image to customers. Standard features include an **all-metal housing, solid steel perforating blades, rugged metal gearing, emergency stop button, auto-stop guard to prevent jams, and a bold-print measuring scale**.

Trim to the Perfect Size

Simply set the side guide to trim cardboard to the custom size of your product and shipping box

Simple Push-Button Control

Start, stop, and reverse easily with a single toggle switch

Perforation Transformation

Cardboard up to .4" thick is quickly transformed into valuable net-like cushioning packing material

Safety First

Emergency Stop Button, and Outfeed Auto-Stop Guard are standard features

The Environmentally Friendly Greenwave 432

REDUCE: Reduce or eliminate the need to purchase costly single-use plastic or foam packing materials, as well as the cost of waste disposal.

UPCYCLE: Give new life to the cardboard packaging you already have.

REUSE: Use an existing product instead of buying new packing materials.
