

# CONVEYOR TO STRETCH WRAPPER EFFICIENCY!

**PRESS A FOOT PEDAL TO TURN PALLETS  
90 DEGREES FOR FASTER & EASIER  
STACKING OF PALLETS.**

The operator takes bags off the conveyor and builds pallets on the turn table of the wrapper. A foot pedal allows the operator to turn the pallet 90 degrees with a single tap to eliminate the need to walk around the pallet. A 30" Carriage wraps the pallet more quickly and better contains the loads, while using less film than a 20" carriage would. This customer ordered two wrappers so that one pallet could be wrapped and unloaded while the other pallet was being built. Scales can be added to wrap and weigh in one step. Top Sheet Selector and storage rack are available.

Banding Film means No more Film Breaks! The Reinforced Laminated Banding Film eliminates Corner Boards and Strapping. Provides Outstanding Containment Including the Middle of the Pallet where "Force-To-Load" is typically weak. Partially unwrapped pallets retain containment force. Tie your loads to the pallet. This is an excellent solution for Beverages, Pails, Bags, Uneven loads, Bricks and Blocks, high puncture hazard loads, and other difficult-to-wrap products.
