

You're not seeing double, you're seeing **TRIPLE!**

***THIS SYSTEM CAN WRAP AS MANY PALLETS
AS A TYPICAL CONVEYORIZED SYSTEM!***

Wraps 3 pallets at one time. *80-90 pallets per hour!*

This food distributor uses triple pallet rider jacks. They need an efficient way of being able to drop 3 pallets at a time for the purpose of being stretched wrapped.

***Drop the first pallet, move forward and drop the
second, move forward and drop the third, move
forward and tug the pull cord!***
